Program Management
Security Clearance

Tom Stevens

Retired aerospace program manager
Palmdale, California, United States

Summary

In the world of hunters and skinners, I'm a skinner. I'm adept at standing up and executing complex, geographically diverse technology development programs in the aerospace and DoD sectors. Less suit, more battle axe. $100M to $10B is my sweet spot.

Experience

Lockheed Martin Corporation
16 years

Program Manager
July 2010 - Present (16 years)

Responsible for management of complex development effort.

Senior Manager
December 2016 - September 2025 (8 years 10 months)
United States

Advanced Prototyping lead, responsible for a portfolio of complex aviation system products. Using advanced materials and methods to create structures, software-intensive systems, and best-in-class capabilities and user experience -- with dramatically lowered cost and risk for an industry-leading value proposition.

Lockheed Martin Corporation
Integration Architect
June 2006 - March 2010 (3 years 10 months)

Architecture subject-matter expert; Technologist; Project leader

Battelle Memorial Institute
Principal Research Scientist
January 2000 - October 2005 (5 years 10 months)

Worked architecture and interoperability issues in the DoD sector.

USMC

Senior MAGTF Architecture Analyst

2002 - 2004 (2 years)

Developed architecture-based interoperability assurance methodologies.

Education

University of Redlands

BS, Mathematics · (1984 - 1988)

UC Irvine

University High School
