Aydin Yolar

Product @ Anduril Industries | UC Irvine MBA | Ex-Amazon | Ex-Nike
Irvine, California, United States

Summary

I am a global citizen and second-year MBA student and Class Representative at the Paul Merage School of Business, with a background in Operations and Logistics at Amazon. Growing up, I had the opportunity to live internationally, in Malaysia and Thailand, for 8 years. At Amazon I was one of the site leads at the largest delivery station in North America, and tackled cross functional projects focusing on cost, quality, people, and safety, working towards a scorecard with over 25 KPIs.

Currently, I am pursuing my MBA to further develop my leadership skills and to help increase my scope and ability to solve problems on a global scale. My target role is in Global Operations and Supply Chain or Project Management, and I want to work in an industry that can help positively impact the world.

Please do not hesitate to reach out if you have any questions.

Experience

Anduril Industries
1 year

Senior Software Product Manager, Warehouse Management Systems
May 2026 - Present (2 months)
Costa Mesa, CA

Building

Strategic Operations
July 2025 - Present (1 year)
Costa Mesa, CA

· Owned material systems and inventory readiness for two strategic high-visibility production launches, including the stand-up of a brand-new manufacturing site for a high-visibility government program, by building material flow plans and configuring inventory systems to program-specific requirements.

· Delivered real-time production visibility to senior government stakeholders, resulting in on-time delivery of the strategic government product, a successful site go-live, and a 99.6% operational readiness test pass rate with a perfect 100% on material flow.

· Led the go-live and hypercare of a new Warehouse Management System across 20+ sites, 15+ product lines, and nearly 1,000 active users for a company-wide ERP migration.

· Owned data conversion and warehouse-bin mapping for over 150,000 items with less than 1% mismatch at cutover, building a cross-functional tiger team and running twice-weekly office hours to white-glove product lines through the transition.

· Coordinated and executed a C-Suite Warehouse Management System device demonstration, preparing all hardware, validating live transactions across systems, and supporting senior leadership in delivering the presentation.

· Designed and executed company-wide system integration testing for an enterprise ERP migration, coordinating 10+ sites and 5 business lines through 1,900 test transactions and triaging 300 critical defects pre-go-live.

· Established the testing framework that became the blueprint for company-wide user acceptance testing, including kickoff coordination across 50+ stakeholders and a defect catalog identifying root causes and remediation paths.

Nike
Global Supply Chain & Operations Graduate Intern
June 2024 - August 2024 (3 months)
Beaverton, Oregon, United States

• Developed a KPI scorecard for a multifaceted business initiative by identifying key benefits and opportunities, leading to defining the future implementation roadmap of the initiative and devising a plan projected to increase revenue by over $25 million.

• Synthesized insights from key international and cross functional stakeholders on pain points and manual touchpoints to create alternative use cases for

a business initiative, projected to drive revenue growth, cost reduction, and marketplace shaping.

Amazon

3 years 2 months

Operations Manager

March 2022 - July 2023 (1 year 5 months)

San Francisco Bay Area

• Created and implemented strategic actions to address safety KPIs resulting in the site going from the highest injury rate in North America to receiving 0 injuries over a rolling 4-month window and achieving the highest possible scores in all safety KPIs.

• Managed an organization of over 200 people, with 11 direct reporting managers through weekly and monthly 1:1's and development plans, resulting in the promotion of 8 direct reports into roles with higher scope due to performance.

• Introduced a comprehensive daily planning process of an over 10 million annual budget which optimized headcounts and allowed the site to perform at its most efficient, resulting in achieving near perfection in quality KPIs due to efficiently processing and delivering all packages on time.

• Operated and managed a 20-item KPI scorecard covering Cost, Quality, Safety, and People through data analytics, daily planning, and active management of the operation, resulting in the station moving from rank 631 to achieving rank 3 for all large sites in the World.

Area Manager II

April 2021 - March 2022 (1 year)

San Francisco Bay Area

• Analyzed performance data for night shift associates and implemented a strategic improvement plan which resulted in an increase of over 15 packages per hour, or a cost savings of approximately $750,000 annually due to the increase in efficiency and reduction in overall labor hours per day.

• Implemented a detailed planning process on the night shift, improving missed volume targets from upwards of 10% daily to processing all volume without overspending hours, resulting in cost savings and achieving quality KPIs.

• Owned critical quality and safety KPI metrics at the site level, leveraging managers from different teams to own and bridge performance, creating best practices and standard work, earning the “Cowabunga award” for most improved site, the 2nd place in North America in multiple safety metrics

Area Manager I
June 2020 - March 2021 (10 months)
San Francisco Bay Area

• Launch Manager for the 2nd largest delivery station in Amazon’s North American network, actively planning the shifts, managing 180 associates over 4 unique processes throughout the day.

• Drove process changes to increase critical efficiency and performance metrics 300%, effectively managing and delegating to a team of managers and process assistants.

• Implemented operational and efficiency improvements resulting in cost savings of 400% in a 5 week span, and increased efficiency and execution throughout the station.

• Created productivity tools using SQL and Excel for the SF Metro region, currently rolling out across the North American region.

• Responsible for associate engagement station wide, driving the metric from 30% to current network high of 93% through manager tips and tricks, associate competitions and recognition programs, including the creation and reinstitution of the associate “swag-bucks” program.

• Participated in numerous safety initiatives, successfully reducing injury rates site-wide.

Robert Half
Corporate Services Staffing Intern | Business Systems Analytics
June 2019 - August 2019 (3 months)
San Ramon, CA, United States

• Researched, communicated cross-functionally, wrote test scripts, tested, and implemented company-wide changes using Workday on pay results, benefits, elections, taxes, and time offs.

• Created and maintained Knowledge Base consisting of solutions from previous projects and testing data to bridge the gap between technical staff and end users, increasing efficiency and accuracy.
