Honors-Awards

The Winner of the XII International Competition "Mathematics & Projecting", 1st place

Dinmukhammad Bekzhan

Software Engineer @farm360.ai

Seoul, South Korea

Experience

Farm360.ai

Full Stack Software Engineer

February 2025 - Present (1 year 1 month)

Seoul, South Korea

Working on software and hardware for vertical smart farming.

CEREBRA

Machine Learning Intern

June 2024 - August 2024 (3 months)

Almaty, Kazakhstan

Contributed to the development of AI-driven solutions in the medical field, focusing on brain stroke detection from non-contrast CT scans. Trained and evaluated Vector-Quantized Variational Autoencoder (vqVAE) models for unsupervised classification tasks (utilizing PyTorch). Measured model performance by analyzing Mean Squared Error (MSE) loss distributions and constructing PCA plots for artifacts and non-artifacts encodings. Developed Python scripts for preprocessing and cleaning CSV datasets. Created comprehensive documentation for the company’s product pipeline.

Korea Advanced Institute of Science and Technology

Undergraduate Teaching Assistant

September 2021 - June 2023 (1 year 10 months)

Daejeon, South Korea

Facilitating a meditation course for 100+ students. Helping students develop better control of their attention spans by engaging in exercises that focus on body sensations. Encouraging students to attentively observe their thoughts and feelings and describe them in detail, so that they have clearer understanding of their current mental and physical states. My contribution is to help students destress and self-reflect.

TentuPlay (Sentience, Inc)

Software Engineer

January 2022 - March 2022 (3 months)

Seoul, South Korea

Jan - Feb / Redesigned client authentication procedure: Merged a separate authentication repository into the main server repository. Removed dependence on third party servers for sending confirmation emails. Replaced busy-waiting system with asynchronous approach. Decreased email sending delay from 2 mins to under 5 secs. Raised email delivery rate to 100%.
Mar / Tested Java and Kotlin tools for Android SDK development of TentuPlay product.

ZeroToOneLabs.com
Mobile Developer
June 2018 - August 2018 (3 months)
Almaty, Kazakhstan

7-week mobile development boot camp aimed to produce job-ready mobile app engineers. Lectures on architectures, patterns, algorithms, machine learning & blockchain applications, mobile design & development. Main tracks on IOS and React Native. Provides industry guest lectures, professional networking, and experience with the press.
