Victoria Lang

Senior DevOps & Cloud Infrastructure Engineer | 15+ Years Experience

United States

Summary

I am a results-oriented Senior IT Operations and Cloud Engineer with over 15 years of experience designing, automating, and scaling mission-critical infrastructure for global enterprises. I have a proven track record of improving system reliability, reducing downtime, and driving DevOps transformation in highly available, 24/7 production environments.I am passionate about Linux systems, Kubernetes, CI/CD, and cloud automation. I am dedicated to mentoring teams and fostering diversity in the technology field.

Experience

Cisco

Senior Cloud Infrastructure Engineer

June 2018 - May 2024 (6 years)

Lead design, deployment, and ongoing operations of multi-cloud infrastructure (AWS, GCP) supporting 10k+ internal users and critical business services.

Automate infrastructure provisioning and configuration using Terraform, Ansible, and Python, reducing manual effort by 60% and improving deployment consistency.

Manage Kubernetes clusters (EKS, GKE) and CI/CD pipelines (Jenkins, GitLab CI), ensuring 99.99% uptime for core applications.

Collaborate with security and product teams to implement monitoring, logging, and alerting stacks (Prometheus, Grafana, ELK).

HP

DevOps Engineer

July 2013 - May 2018 (4 years 11 months)

Owned end-to-end build, release, and infrastructure automation for HP’s enterprise software division.

Migrated legacy on-prem systems to virtualized and cloud environments, cutting data center costs by 35%.

Developed and maintained internal tooling for system health checks, backup verification, and capacity planning.

Partnered with engineering teams to streamline SDLC and improve release frequency while reducing incidents.

Fiserv
Systems Engineer, IT Operations
June 2009 - June 2013 (4 years 1 month)

Managed 24/7 production support for core financial services platforms running on Linux and Unix.

Performed incident response, root cause analysis (RCA), and post-mortems for critical outages.

Administered network, server, and storage infrastructure; implemented patch management and compliance controls.

Created runbooks and standard operating procedures to improve team efficiency and reduce repeat issues.

General Mills
Information Technology Infrastructure Engineer
July 2006 - May 2009 (2 years 11 months)

Supported global manufacturing and corporate IT systems, including ERP, warehouse management, and office productivity tools.

Maintained Linux/Windows servers, Active Directory, DNS, and file services for 5k+ employees.

Assisted in data center migrations, hardware refreshes, and virtualization projects.

Provided tier-3 support for escalated incidents and collaborated with vendors on system issues.

Education

Georgia Institute of Technology

Master of Science, Computer Science

National University of Singapore

Bachelor of Computing, Computer Science
