Top Skills

Panorays
Panorays Platform
Apache Spark

Languages

English (Native or Bilingual)
Russian (Professional Working)
Hebrew (Native or Bilingual)
Georgian (Professional Working)

Certifications

CS190.1x, Scalable Machine Learning
CS100.1x, Introduction to Big Data with Apache Spark

Honors-Awards

Certificate of Excellence from the Commander in Chief of the Israeli Air Force (General)
Certificate of Excellence - Head of Department (Lieutenant Colonel)
Google Developer Expert

Demi Ben-Ari

Co-Founder & CSO at Panorays
Israel

Summary

Software engineer, Entrepreneur and an International Tech Speaker. Over 10 years of experience in building various systems both from the field of near real time applications and Big Data distributed systems.
- Google Developer Expert (GDE) - Google Cloud Platform.
- Co-Founder of the “Big Things” Big Data community and Google Developer Group Cloud.
Big Data Expert, but interested in all kinds of technologies, from front-end to backend, whatever moves data around.

Experience

Panorays
10 years 2 months

Co-Founder & Chief Strategy Officer, Technology Alliances
July 2025 - Present (1 year 1 month)
Israel

Co-Founder & CTO
January 2020 - July 2025 (5 years 7 months)

Co-Founder, VP R&D
June 2016 - January 2020 (3 years 8 months)

Panorays automates third party security management

A startup of Big Data in the field of Cyber Security.

badook AI
Advisory Board Member
February 2019 - October 2022 (3 years 9 months)
Melbourne, Victoria, Australia

Windward
Senior Data Engineer

October 2014 - February 2016 (1 year 5 months)
Israel

Migrating a monolithic system from an on premise datacenter into the cloud (Amazon Web Services) and changing it to a distributed microservices architecture,
Using Apache Spark as the computation engine and MongoDB, Apache Cassandra and S3 as the persistence layers.
Working with RESTful microservices with node.js and ob1k frameworks and forming a Data Pipeline with Apache Spark microservice applications, mostly working with Core Spark (In the beginning worked with Amazon's EMR and switched back to Spark standalone deployment).

Setting up Apache Cassandra infrastructure and all of its operations, Cassandra monitoring, managing various Data Modeling methods and writing application code as well.
Handling performance tuning of Apache Spark, Cassandra, MongoDB and working with S3.

Forming a Continuous Deployment environment of Spark application with the infrastructure of Maven, Nexus and automation with Jenkins.
Working with Monitoring and logging systems: Graphite, Grafana, ELK.
Most of the data work was with Time Series Data, Managing, Storing and handling missing data, around 100GB+ of raw data per day.

Ofek Unit - IAF
7 years 10 months

Senior Java Software Engineer
October 2012 - February 2015 (2 years 5 months)

• Senior Software Engineer in a Java Infrastructure team, supporting over 200 developers in the Organization.
• Research & Development of new technologies for the team and the Unit.
• Java Tools and technologies for the Organization (JavaFX, Testing Frameworks, Logging, Java8, etc)
• BigData (Hadoop over Cloudera Linux Distribution).
• Android mobie Application development.
• Writing and implementing Java Training program for the organization.
• Tools assimilation in development teams (Maven, Nexus, Hudson)
• Java Performance Analysis and Profiling.

Air Defense Software Developement Team Leader

May 2010 - October 2012 (2 years 6 months)

• Managing a Team of 5-8 Software Engineers.
• Hands-On Development of a Java GUI infrastructure for rich client application, XML Based wrapping Swing components.
• Writing the System architecture of the GUI framework and High Performance Near Real Time application.
• Working closely with Users, Requirements collection and System Design.
• Defining the UX of the client side.
• Agile development in Scrum.
• GIS mapping product - InterMAPhics (High performance Dynamic mapping tool).
• Working with Continuous Integration via Hudson and automation of GUI testing framework (Marathon).
• Managing system servers on Linux (RedHat)
• Emphasis in the development was put on meeting performance, stability and work-loads.

Air Defense C&C Software Developer

May 2007 - May 2010 (3 years 1 month)

• Developed a Legacy Air Defense C++ and MFC Desktop Application on Windows.
(Managing Unix & Linux Servers, and Oracle 10g Database)
• Rewriting the GUI Infrastructure of the Application in .NET Framework (WinForms, C#).
• Developed all the Data structures supporting Near Real Time data distribution.
• Distribution system of WebSphereMQ of IBM.
• Extensive use of GIS Tools (MapCore, ESRI Dynamic Display)
• Oracle client for communications with the central Database.
• 24/7 support of the Production operational system.
• Developed under XP methodology, including: requirements analysis, system design, technology benchmarking, implementation and testing, integration, deployment, maintenance.

Education

The Academic College of Tel-Aviv, Yaffo

B.Sc., Computer Science, Specialized in Managment, Information Technology Project Management · (2010 - 2013)

IDF - Programming Course (Mamram)

Computer Programming · (2006 - 2007)
