Robin Vabolis

Building Responsible Futures: AI Strategy, Crisis Leadership, Organizational Resilience
Norfolk, Virginia, United States

Summary

I work at the intersection of technology, ethics, and organizational leadership. With a foundation in highly regulated sectors and a growing focus on responsible AI integration, I help organizations navigate complex transformations with strategic clarity and care. I believe innovation must be as human-centered as it is future-facing.

Experience

Hitherto AI

Lanternwright, Reason Weaver, Red Teamer (Founder)
December 2024 - Present (7 months)
Norfolk, Virginia, United States

As Director of Hitherto AI, I lead the ethical testing, adversarial evaluation, and philosophical framing of large language models. My work focuses on identifying cognitive, epistemic, and moral failure points in AI systems through psychological red teaming, STEM-based reasoning challenges, and expressivity audits.

I also design the ethical scaffolding and conceptual architecture for early-stage model training strategies that emphasize discernment, skepticism, and internal coherence — long before exposure to high-volume data.

Key contributions and successes:

Developed Hitherto’s three-arm structure: Friction Lab (red teaming), Reason Forge (epistemic testing), and Flux Hall (STEM & expressivity analysis)

Authored interdisciplinary essays on model reasoning, alignment risks, and the moral character of AI outputs

Created a multi-platform public presence including an accessible website, branded visual identity, and integrated Substack channel

Delivered high-integrity red teaming assessments to model vendors, successfully identifying latent vulnerabilities in reasoning and compliance behavior

Outlier
AI Prompt Engineer / Red Teaming Evaluator (Contract)
September 2024 - Present (10 months)
San Francisco

- Designed adversarial prompts targeting physics and biology domains to test language model robustness and alignment.
- Identified model weaknesses and hallucinations, successfully stumping LLMs in 97% of test cases.
- Generated high-quality, reproducible input/output logs used by alignment and research teams.
- Collaborated on red teaming scenarios mimicking real-world misuse cases.
- Delivered detailed evaluations for use in fine-tuning and model safety improvements.

Prolific
AI Research and Training Strategist/Consultant
February 2021 - Present (4 years 5 months)
USA Remote

WNC Advocacy League
Executive Director
February 2012 - March 2017 (5 years 2 months)
Asheville, North Carolina, United States

- Staff and volunteer hiring and training
- Case management and research
- Program development and client success strategy
- Conflict resolution and crisis management
- Mediation
- Accompanied clients to medical and legal engagements, including courtroom while liaising with related professionals.
- Fostering community engagement and social media management
- Ensured HIPAA and confidentiality compliance
