Archive
Chairman & Co-founder
March 2021 - Present (5 years 4 months)

Archive is an AI lab building end-to-end creator marketing agents.

Archive agents are AI teammates that recruit, brief, manage and pay creators — so brands can scale their creator programs 100x without adding headcount.

Trusted by global brands like L’Oréal, Quest Nutrition & NASCAR, and backed by Stripe, Lux Capital, Battery Ventures, Human Capital, Tiger Global and founders/C-suite of Ramp, Doordash, OpenAI, Perplexity, Applied Intuition, Hugging Face, etc.

KETONE-IQ

Angel Investor

Investor

2015 - 2021 (6 years)

First round investor in Ramp, Chronosphere, Eight Sleep, and ~20 top technology start ups. I like to help founders / CEOs with strategy, fundraising, and product.

Founded Anti Fund in 2021 with Jake Paul and transitioned to an institutional investor.

Glassmap (acquired by Groupon)
CEO & Co-founder
January 2011 - January 2013 (2 years 1 month)
mountain view, ca

Started my first company as a college senior in January 2011. Raised capital from Y Combinator in Summer 2011. Sold the company to Groupon Inc. (NASDAQ: $GRPN) in January 2013.

Glassmap was a real-time map for iOS and Android that let users keep track of friends and family and discover and share interesting and relevant things happening around them. We also spun off a B2B service for small/medium-sized businesses to do CRM and ad/deal targeting.

My colleagues and I were granted US Patent 9628957 titled "Method and system for determining location of mobile device" for our technology.

Arista Networks, Inc.
Software Engineer (Research)
January 2011 - June 2011 (6 months)

Worked on my undergraduate honors thesis alongside folks building the best network switches in the world.

Stanford University
3 years 1 month

Research Assistant
June 2009 - June 2011 (2 years 1 month)

Worked with Prof. David Cheriton's Distributed System Group on architecting and implementing highly evolvable/modular distributed blackboard diagnosis systems.

Research Assistant
June 2008 - June 2009 (1 year 1 month)

Worked with Prof. Mark Horowitz's group on automatic reconstruction of noisy electron tomography image series. Developed novel algorithm based on SVD modified by RANSAC.

OptumSoft

Software Engineer

June 2010 - September 2010 (4 months)

Early-stage distributed systems technology company founded by my undergraduate adviser, Prof. David R. Cheriton.
