Stephen Fujiwara, MBA

Senior Director, U.S. Defense | Revenue Growth, Capture & GTM | APNT, INS & Autonomous Systems | Navy Submariner (Ret.)
Portland, Oregon Metropolitan Area

Summary

At Advanced Navigation, our relentless endeavor is to provide our customers with best in class navigation solutions. We build high quality products for both defense and commercial markets.

They are designed to deliver critical navigation information across sea, land and air platforms including surface, sub-sea assets, ground vehicles, and unmanned aerial vehicles applications.

Many of the world's leading companies use Advanced Navigation including Airbus, Boeing, General Motors, Lockheed Martin, NASA JPL, Tesla, Thales and more.

I'm a former Naval Petty Officer, I worked in Submarine and Unmanned Underwater Vehicle Technology fields for over 15 years, and I work hard to help customers with there navigation and robotic needs.

I'm easy to reach at (863)777-0224 and at Stephen.Fujiwara@advancednavigation.com

Experience

Advanced Navigation

Senior Director of Business Development Defense
April 2018 - Present (8 years 3 months)
Portland, Oregon Metropolitan Area

- Scaled U.S. and defense portfolio to $100M+, contributing to $200M+ U.S. market growth through strategic account development and program capture
- Served as sole U.S. defense leader, building the market from zero presence to a multi-program, multi-customer portfolio across all branches of the U.S. military and major primes

- Played a key role in Series A, B, and C funding rounds, supporting sustained 100% year-over-year growth over 8 years and contributing to the company achieving unicorn valuation status
- Built and led a 30+ person team, establishing sales structure, pipeline discipline, and customer engagement strategy across North and South America
- Developed and executed strategic partnerships with top-tier defense customers, aligning product capabilities to mission-critical requirements in denied and contested environments
- Led end-to-end capture strategy across RFI/RFP/RFQ processes, converting technical positioning into awarded programs
- Delivered technical and executive-level engagements, translating complex navigation and autonomy systems into operational and mission value.

UNITED STATES DEPARTMENT OF THE NAVY

16 years

SUBDEVRON 5-Mission Control Officer

2014 - 2018 (4 years)

United States

-Developed and modified Intergraded Logistics Support products to include technical manuals, maintenance standards, Maintenance Requirement Cards (MRC) Manual Change Requests, and training courses for ocean engineering concepts and technology.
-Supervised the operation and maintenance actions on side scan SONAR and UUV systems on board US Navy vessels conducting open ocean operations.
-Mentored all personnel for career progression and increased responsibility by preparing them for leadership roles which resulted in an advancement rate higher compared to other squadrons.
-Conducted regular internal audits on training, qualification programs, preventative maintenance programs, and command-generated instructions resulting in an excellent rating on the most recent Operational Readiness Evaluation performed.

NAVY RECRUITING FAIRBANKS,AK. Recrutier in Charge

2011 - 2014 (3 years)

United States

- Managed and directed a cumulative sales force of 5 Recruiting Specialists in one of the historically most difficult recruiting areas of the country.
-Created and monitored market penetration plans and built rapport with local officials and businesses to assist in sales goal attainment efforts.

-Led, managed, trained, and coordinated the use of all Navy recruiting systems and resources.
-Conducted extensive training on recruiting system and Professional Selling Skills, significantly improving Recruiter productivity.
-Well-versed in a broad spectrum of community resources including career fairs, speaking engagements, and media interviews.
-Ranked #1 in the district.

AFGHANISTAN-Force Commander (Combat deployment)
2009 - 2011 (2 years)
Afghanistan

-Directed a joint force of 120 sailors and the Afghanistan National Army supervising daily operations ensuring the care, custody, and control of 4,800 detainees and accountability of 2000 sensitive items. Conducted daily status briefs and written reports to the Battalion Commander.
-Co-author of the Standard Operating Procedure for all day-to-day operations.

USS CITY OF CORPUS CHRISTI & USS MICHIGAN Leading Petty Officer
2002 - 2009 (7 years)
United States

-Supervised troubleshooting of component failures, system upgrades, and installation of approved system modifications to sonar, fathometer, and ship control systems.
-Mentored and trained 20 subordinates in proper maintenance practices for periodic scheduled maintenance as well as preventative and corrective maintenance, troubleshooting, and failure analysis utilizing various electronic test equipment such as multimeters, megohmmeters, and oscilloscopes following wiring schematics.
-Responsible for the preventive and corrective maintenance of multiple shipboard systems. Systems included hydraulic, 400HZ precision power systems, multistage power active sonar transmitters, and over 1,100 sonar transducers.
-Lead fault analyst for the AN/BQQ-10 ARCI sonar system, locating faults and troubleshooting or repairing failed components and servers.
