Mark Daniel

Mission Focused System-of-Systems Architectures for the United States Space Force and Air Force
Lexington, Massachusetts, United States

Summary

Experienced Program Manager and dynamic leader with demonstrated success leading large and small programs for DOD and National Security. Demonstrated success leading technical teams to solve challenging problems and deliver effective solutions. Experience managing programs in systems engineering, hardware design, software development, and operations meeting ISO 9001 requirements using both Phase Gate Design and Agile Development processes, ensuring accurate, timely, and secure deliveries through DevSecOps and Model Based Engineering.

Experience

DAF PAE C3BM

3 years 11 months

Senior Advisor, Maritime Mission Integration

November 2025 - Present (9 months)
Hanscom Air Force Base, Massachusetts, United States

• Principal technical expert for crafting system-of-systems architectures and strategies for the Department of the Air Force's Contested Maritime mission area.

Division Chief, Maritime Mission Integration

May 2025 - November 2025 (7 months)

• Directed the full lifecycle of architecture design and delivery—from operational analysis to system acquisition and testing—to establish and ensure capability delivery for the Counter-Maritime mission area.

Division Chief, Air Mission Integration

September 2022 - May 2025 (2 years 9 months)
Hanscom Air Force Base, Massachusetts, United States

• Responsible for designing and delivering the architecture necessary to achieve air superiority in a modern conflict. This effort spanned the full lifecycle of operational analysis, architecture design, system acquisition, test & evaluation, and system delivery.

Air Force Research Laboratory
Engineer
September 2021 - November 2025 (4 years 3 months)
Lexington, Massachusetts, United States

Received 2022 AFRL Commander's Cup

• Developed and managed the system of system architectures providing Air Force and Space Force senior leadership clear and relevant data to drive modernization and investment priorities, synchronize acquisition activities, and ensure delivery of the integrated capabilities necessary to defeat the pacing challenge.

United States Department of the Air Force
Chief Engineer- DAF Chief Architect Office
September 2021 - September 2022 (1 year 1 month)

• Spearheaded the development of a multi-disciplinary system of systems architectural approach, provided technical oversight and leadership of multiple engineering teams.
• Developed a software-defined network architecture to address critical operational gaps and provide resilient communications in support of JADC2. Led a prototyping effort to demonstrate the architecture in exercises and operations, delivering mission critical communications. This architecture was the basis for future Department of the Air Force (DAF) and Joint network designs.
• Directed the development of a DAF data architecture to align acquisition of USAF & USSF data systems; ensuring composability and interoperability while enabling rapid modernization to leverage best in breed capabilities. An MVP of this architecture was deployed in support of USSF operations, enabling systems to rapidly ingest non-traditional data sources, reducing processing time from hours to seconds in support of mission requirements. This architecture was used in the development of multiple Air Force and Space Force systems supporting critical operations.

MIT Lincoln Laboratory

Program Manager, Artificial Intelligence Software Architectures & Algorithms
December 2019 - September 2021 (1 year 10 months)
Lexington, MA

Draper
Program Manager, Strategic Systems
June 2015 - December 2019 (4 years 7 months)
Cambridge, MA

Program Manager overseeing multiple programs in the Strategic Systems business portfolio supporting Trident Missile Guidance Systems

• Ensured on-time execution with first time quality across multiple contracts. Efforts included engineering services, systems engineering, software development, test equipment, and data analysis programs.

• Managed cross-functional teams utilizing Model Based Systems Engineering to develop advanced test equipment, delivering enhanced test capabilities to support ground-based weapon system evaluation.

• Led numerous engineering teams, offsite subcontractors, and collaborative partnerships to ensure successful program execution while regularly supporting program reviews and briefing customer senior leadership.

US Navy
8 years 4 months

Submarine Warfare Officer
May 2007 - August 2015 (8 years 4 months)
Charleston, South Carolina, United States

Tactics Officer
November 2013 - June 2015 (1 year 8 months)
Submarine Learning Facility

Ranked #1 of 10 Tactics and Engineering Officers

Master Training Specialist

Division Officer
October 2010 - October 2013 (3 years 1 month)
USS SCRANTON (SSN 756)

Junior Officer of the Year onboard USS Scranton 2012

Ranked #1 of 10 Junior Officers

Qualified Nuclear Engineer Officer

Stanford VLF Group

Graduate Research Assistant- Project Manager
June 2007 - March 2009 (1 year 10 months)
Palo Alto, CA

PROJECT MANAGER

FIELD ENGINEER

GRANT WRITING

Education

Stanford University

MSEE, Electrical Engineering · (2007 - 2009)

United States Naval Academy

BSEE, Electrical Engineering · (2003 - 2007)
