Foundation

Chief Executive Officer
August 2024 - Present (1 year 7 months)
Tokyo, Japan

MeetsMore

Engineering Leadership
2018 - August 2024 (6 years)
Tokyo, Japan

Took it from seed to Series B. Not easy in Japan.

Tech stuff I'm proud of:

1. First versions of core systems

- Maps (our own end-to-end geofences, integrated with matching)
- Core Pricing
- Dynamic Questionnaire Flow (MeetsMore's main product)

2. Early dbt adoption in Japan. Saved us from data chaos.
3. Cut $1M+ in cloud costs. Capacity planning is underrated.
4. Solid observability and on-call. Sleep is nice.

Building the team:

- Hired ~15 top engineers (3 ex-CTOs)
- 100% close rate on people I wanted
- Ditched recruiters. Waste of money.
- Got to engineers hiring engineers. Much better.

Shipped fast. Broke nothing important. Solved interesting problems. Excited to do it again for my new company.

Uber

Software Engineer, Tech Lead
October 2014 - September 2018 (4 years)

Started by working w/ David Plouffe (Obama's campaign manager): we made Uber legal in all 50 States.

Moved to uberPOOL, ran upfront pricing mostly solo first 1.5 years.

In final two years, singlehandedly launched v1 of Uber One.

Final act: worked with rest of our amazing Fares team: made upfront pricing global standard for almost all Uber trips, redesigned Fares Platform to be ready for Uber's IPO. Great ride :)

ThirdLove
Founding Engineer
July 2013 - October 2014 (1 year 4 months)
San Francisco, CA

Logiblock (YC W13)
Founder, CTO
November 2012 - April 2013 (6 months)
San Francisco, CA

- designed and developed the Logiblock IDE - a browser-based cross-platform desktop application using Node.js, Backbone.js, and Backbone Marionette
- created a Kickstarter scraper and à la carte add-on system on an extremely short deadline (~3-4 days)
- set up entire scalable IT infrastructure, hosted on an AWS VPC

Luidia
Senior Software Engineer
July 2011 - November 2012 (1 year 5 months)
San Carlos, CA

- designed and implemented a cross-platform C/C++ API for Luidia’s educational whiteboard - hardware
- created an emulator for Luidia’s hardware that made 90% of the previous QA tests completely automated, allowing QA to focus on higher-level testing
- convinced management and engineering team to switch to Git/Github from SVN, led engineering meetings, was offered promotion to team lead

Insight EDA, Inc.
Senior Software Engineer

November 2010 - May 2011 (7 months)
Redwood City, CA

Unified Color Technologies

2 years 8 months

Software Engineer

August 2009 - October 2010 (1 year 3 months)

Software Engineering Intern

March 2008 - July 2009 (1 year 5 months)
