Aptitudes principales

Ethereum
Consensus Protocols
Python (Programming Language)

Languages

Inglés (Full Professional)
Español (Native or Bilingual)

Certifications

Fundamentos de Ingeniería de Software
Platzi programación basica
Curso de computación básica
Taxonomia y Arquitectura de redes blockchain
Introducción al Desarrollo Web I

Jacobo Uribe

Blockchain | Cryptoeconomics
Barcelona, Cataluña, España

Extracto

My main interest is the intersection between new models of wealth distribution and how blockchains get to achieve protocol economic security.

Experiencia

MigaLabs

Node operator & DeFi research
febrero de 2024 - Present (2 años)
Barcelona, Catalonia, Spain

MigaLabs is a research and development observatory specialized in the Ethereum ecosystem.
My current focus is developing insights into protocol design, consensus mechanisms, and validator operations while researching Node operator opportunities for liquid staking assets within DeFi.

• Deploy and showcase blockchain data indexing solutions using PostgreSQL and Docker.
• Operate and maintain Ethereum validators on both testnet and mainnet using dappnode and vanilla setup.
• Monitoring with Grafana and Prometheus.
• Building containerized applications for node deployment.
• Monitoring resource consumption for different client combinations.
• Conduct continuous monitoring and research on AVS ecosystem, tracking weekly trends with the use of Dune analytics and weekly report submission to decision makers.
• Compose a scorecard framework to evaluate Node operations opportunities within the Restaking paradigm (Included technical implementation, economic rewards and risks).

TokenEngineering Academy

Ecosystem Analyst
noviembre de 2023 - noviembre de 2024 (1 año 1 mes)
Barcelona, Catalonia, Spain

Token Engineering Academy is an open learning community dedicated to develop and promote theoretical and practical innovations in Cryptoeconomics across the industry. We aim to leverage knowledge and interest in this field, striving to establish standards that contribute to sustainable growth for decentralized protocols.

• Reading and curating articles and papers relative to DeFI, Complex Systems, Staking, Consensus Mechanisms and Tokenomics for TEA newsletter.

Cenit Finance

Tokenomics Analyst

octubre de 2023 - enero de 2024 (4 meses)

Barcelona, Catalonia, Spain

• Conduct research on Chainlink and Cosmos to model their tokenomics.
• Engage in protocol forums and Discord communities to understand proposals and asses specific questions.
• Reading documentation emphasizing in consensus mechanisms and economic incentives.
• Conceptualize and define visual representations of the token model.
• Use Cenit.Finance modeling and simulation tool to stress test economies.
• Write articles summarizing findings and potential improvements.

Educación

ESEIAAT-UPC

Master of Technology - MTech, Distributed Ledger Technologies - Blockchain · (octubre de 2021 - noviembre de 2022)

Universidad de La Sabana

Bachelor of Business Administration - BBA · (2015 - 2020)
