# Jennifer Shannon MD

GLACIS: Turning AI Claims into Verifiable Evidence, Co-Founder and Chief Medical Officer, Physician
Seattle, Washington, United States

## Summary

I'm a practicing child and adolescent psychiatrist, and I've spent my career at the intersection of clinical care and AI.

With over 20 years of clinical practice, I continue to see patients in multiple treatment settings but realized that without the help of AI, I was never going to be able to help everyone who needed it.

At Cognoa, I served as Medical Director and helped develop the first FDA-authorized software as a medical device (SaMD) for autism diagnosis, navigating and understanding what it actually takes to turn AI promises into regulated, trustworthy medical devices. That regulatory experience taught me something critical: in healthcare AI, "trust us" isn't a compliance strategy.

I also serve on the AACAP AI Resource Committee, where we're shaping how our field thinks about artificial intelligence in child mental health.

When an AI system makes a decision about a patient, logs aren't enough. Regulators and insurers don't want assurances that your safety policies should have run,  they need mathematical proof that they did.

That is how Glacis was born, to build exactly that: the first AI Policy Enforcement Infrastructure that turns safety claims into cryptographic proof. We issue tamper-evident receipts for every AI decision, captured at inference time, our system enforces policies at the edge, seeing only hashes, never your data.

At Glacis, and in my clinical practice, we're taking with AI in healthcare every day. I want to build the proof that translates into trust and physicians need to be leading the charge.

If you're a healthcare AI leader, building, buying, or regulating AI in healthcare or life sciences, I would love to connect.

## Experience

### GLACIS Technologies
Co-Founder and Chief Medical Officer
October 2025 - Present (9 months)

### University of Washington
UW Courtesy Clinical Faculty
March 2025 - Present (1 year 4 months)

### Digital Therapuetics Alliance
Digital Therapeutics Alliance Advisory Board
January 2019 - Present (7 years 6 months)

Member of the DTA Healthcare Advisory Board to help provide guidance to digital therapeutic companies on how to educate and assist with physician adoption

### The Emily Program
Eating Disorders Program psychiatrist
August 2015 - Present (10 years 11 months)
Greater Seattle Area

I provide leadership at the residential facility as psychiatric administrator for a specialized treatment program for patients with eating disorders. I also provide psychiatric services for the outpatient programs and have specialized experience in treating the broad spectrum of eating disorders including anorexia nervosa, bulimia nervosa, and binge eating disorder.
