Daniel ZivKovic

Principal AI Engineer | Agentic Systems Architect
Richmond Hill, Ontario, Canada

Summary

I am a "Hands-on Architect" who can design the strategy on Monday and debug the deployment on Friday. My work blends product vision with engineering craftsmanship: clear specifications, transparent delivery, and measurable results.

With 20+ years in complex enterprise environments, I've learned that the best architecture happens in the code, not just on a whiteboard. I practice "Pull Leadership" - I don't just hand down specifications; I build the proof-of-concept, clear the technical blockers, and teach the team how to ship safely.

MY SWEET SPOT: THE INTERSECTION OF GRAPHS & AGENTIC AI
• The Architect: Designing stateful Agentic Workflows and GraphRAG systems that solve complex problems (Fraud Detection, Lawful Intelligence) beyond simple vector search.
• The Engineer: Writing the production code (Python, LangGraph, LlamaIndex) that brings those designs to life.
• The Teacher: Founder of Serverless Toronto (5k+ members), mentoring teams on Cloud & AI best practices.

TRUSTED BY GLOBAL LEADERS & CONSULTANCIES:
Operating through Magma Inc., I frequently partner with elite firms (Google Cloud PSO, Quantiphi, Intuitive.ai) to deliver mission-critical AI systems for end-clients like Activision, Ford, Nasdaq, Siemens, and Loblaw.

CORE STACK:
• Orchestration: LangGraph, LlamaIndex (Advanced RAG).
• Data & Knowledge: Neo4j (GraphRAG), Vector DBs, SQL.
• Governance: OWASP Gen AI Security, PII Redaction, Observability.

COMMUNITY LEADERSHIP:

Watch sessions from industry leaders at my meetup: https://www.youtube.com/playlist?list=PLd31CCJIr9FrZazLqRg1Lxq7xw9b6VNP6

If you need a Principal who can design the strategy on Monday and debug the deployment on Friday, let's talk.

Experience

Serverless Toronto
Founder and Curator
February 2018 - Present (8 years)
Toronto, Ontario, Canada

Magma Inc.
Principal AI Engineer & Systems Architect
November 2019 - Present (6 years 3 months)
Toronto, Canada Area

Building AI systems that matter: code intelligence for Siemens developers, criminal network detection for law enforcement, LLM cost optimization for Nasdaq. Turning ambiguous problems into reliable, measurable systems through knowledge graphs, agentic AI workflows, and cloud-native architectures. Introduced Compound Engineering methodology at Siemens—achieving 5x delivery velocity through spec-first development where each architectural decision compounds into faster future delivery. Partner with Google Cloud PSO, Quantiphi, and Intuitive.AI to deliver solutions across Financial Services, Healthcare, Telecom, and Manufacturing.

Onica
Cloud Solutions Architect – Serverless & Data Science
January 2018 - November 2019 (1 year 11 months)
Toronto, Canada Area

HOOPP (Healthcare of Ontario Pension Plan)
Technical Product Manager
May 2017 - November 2017 (7 months)
Toronto, Canada Area

Royal Bank of Canada
Solutions Architect – Digital Banking

November 2015 - February 2017 (1 year 4 months)
Toronto, Canada

Tangerine
Integration Architect – Enterprise Architecture
November 2014 - July 2015 (9 months)
Toronto, Canada Area

HOOPP (Healthcare of Ontario Pension Plan)
Solution Architect – Pension Systems
March 2010 - July 2014 (4 years 5 months)
Toronto

TD Securities
Business Systems Analyst – Identity & Access Management
June 2009 - March 2010 (10 months)
Toronto, Canada Area

Magma Inc.
CMS & SEO/SEM Architect
October 2008 - June 2009 (9 months)
Toronto, Canada Area

RBC (Royal Bank of Canada) Financial Group
1 year 8 months

SOA Test Automation Architect
October 2007 - October 2008 (1 year 1 month)
Toronto, Canada Area

Java Spring Framework Architect
March 2007 - September 2007 (7 months)
Toronto, Canada Area

CGI (Services to BCE)
Capacity Planning Analyst
October 2006 - March 2007 (6 months)
Toronto, Canada Area

Teranet Inc.
Application Security Architect
February 2006 - October 2006 (9 months)
Toronto, Canada Area

NuComm International (NuVoxx IVR Services)
Contact Centre Architect
February 2005 - February 2006 (1 year 1 month)
Toronto, Canada Area

Metavante
Enterprise Architect & Systems Engineering Team Lead
March 2000 - December 2004 (4 years 10 months)
Toronto, Canada Area

BMO Financial Group
Systems Integrator – ETL Automation
1998 - 2000 (2 years)
Toronto, Canada Area

MasterCard International (Oasis)
UNIX/Oracle Systems Engineer
1997 - 1998 (1 year)
Toronto, Canada Area

Sun Microsystems
Solaris & Application Migration Specialist
1994 - 1997 (3 years)
Toronto, Canada Area

Synamics Inc
CTI (Computer Telephony Integration) Consultant
1992 - 1994 (2 years)
Toronto, Canada Area

University of Sarajevo
Software Engineer, Unix Developer & TA (Teaching Assistant)
1988 - 1992 (4 years)

Education

Univerzitet u Sarajevu
B. Sc. Electrical Engineering, Department of Computer Science · (1983 - 1988)
