Austin Smith

Supercharging Innovation | Ex-CISA | DHS OG | Explorer and Lifelong Learner
Annapolis, Maryland, United States

Summary

With over two decades deeply immersed in national security, I've dedicated my career to bridging cutting-edge technology with the mission-critical needs of the Federal government. As a former federal executive turned growth leader, I bring unparalleled expertise across the full federal business development lifecycle—from business development, capture strategy and channel evolution to contract acquisition, stakeholder integration, and long-term relationship management.

My unique vantage point—spanning government service, OEMs, VARs, and systems integration—has equipped me to navigate the complexities of the Federal sales cycle, including evolving political drivers, customer motivations, and acquisition nuances. I've built and scaled Federal teams from the ground up, delivering results in high-stakes environments where integrity, informed risk-taking, and relentless innovation are non-negotiable.

I'm particularly passionate about harnessing cybersecurity, artificial intelligence, and data science to protect and empower our nation. These technologies aren't just tools—they're force multipliers that anticipate tomorrow's threats and solve today's toughest challenges in the defense, intelligence, and civilian Federal landscapes.

Whether driving multimillion-dollar opportunities, forging strategic partnerships, or shaping innovative solutions that serve and safeguard our world, I thrive on turning vision into mission success.

If you're advancing Federal objectives in national security, technology innovation, or emerging domains like AI-enabled defense—let's connect. I'm always open to exploring collaborations that push the boundaries of what's possible while upholding the highest standards of service and protection.
