Three-Dimensional Synthetic Aperture Radar Image Formation

Mateusz Marciszewski

Data Science & Engineering for Defense | A.I. Connoisseur
Philadelphia, Pennsylvania, United States

Summary

Jack-of-all trades. I have experience in AWS, Azure, and on-site supercomputing clusters. I find patterns in data, discover actionable insights, build applications/data pipelines and communicate results to stakeholders through whatever means are needed. I am tool agnostic and believe in learning whatever I need to, fast. I love public speaking and can present results to technical or non-technical stakeholders alike.

Got a question or pro-bono work? DM me. I'm around.

Experience

Beautiful Majestic Dolphin
Chief Technology Officer
March 2025 - Present (10 months)

Iron EagleX, Inc.
Data Engineer
July 2024 - Present (1 year 6 months)
Fort Liberty, North Carolina

- Currently building & enabling data driven solutions for SOCOM (Special Operations Command)
- Built Data Pipelines in compliance with DoD STIG requirements for secure communications between multiple applications
- Conducted technical interviews and built out two full stack data teams
- Wrote SOP's for multiple data teams, enabling them to serve 28,000 users

Lockheed Martin
Systems Engineer
February 2023 - June 2024 (1 year 5 months)

- Built prototype of high-performance Python/C++ Application in Linux environment to plan fixed volume radar search (FVS) parameters to track ballistic missile trajectories

• Collaborated with MIT Lincoln Labs & John Hopkins Applied Physics Lab to enhance ballistic missile defense algorithms
• Organized & performed research, user interviews and enhancements to on-site supercomputers to improve throughput for all programs & baselines by 15%
• Conducted code reviews, training, and mentorship of junior engineers

Booz Allen Hamilton
Data Engineer
January 2022 - February 2023 (1 year 2 months)
Brooklyn, New York, United States

• Wrote scripts to measure SQL & NoSQL database performance in AWS data pipeline & report results to stakeholders
• Built & deployed microservices using Docker/Kubernetes, FastAPI and deployed to Azure
• Created synthetic data generator for encrypted PII to test end-to-end data pipeline within AWS/Azure respectively
• Supported mission critical defense projects for various agencies of the United States Government

Genentech
Data Engineer
September 2021 - January 2022 (5 months)

• Maintained facility critical application backend in C# while adding new functionalities on users request.
• Utilized R to generate quarterly report to measure user statistics on facility application use to ensure smooth transition from legacy to newer systems.
• Worked with management and process engineers to streamline production of new functionalities.

Collins Aerospace
Data Science & Analytics Co-Op
May 2021 - December 2021 (8 months)
Richardson, Texas, United States

• Utilized Regex, Java within various ETL tools to effectively profile data and automate quality checks for various data streams across business units.
• Utilized probabilistic and deterministic algorithms to accomplish record linkage utilizing metadata.
• Created dashboards and metrics with Tableau to communicate ongoing results to stakeholders.

Sigma Technologies
Data Science Specialist
October 2020 - May 2021 (8 months)
Los Angeles, California, United States

• Assisted clients in multiple lead generation projects, utilizing python web scraping libraries and various data mining techniques.
• Advised and assisted in development of data visualization & presentation standards for internal client use.

Prins Company
Executive Account Manager
August 2017 - October 2019 (2 years 3 months)
Scottsdale, Arizona

• Doubled the number of accounts in the Pacific Northwest region and reactivated over 15 lapsed (churned) major accounts in the Midwest and East Coast and brought their total revenue back up to over $300,000 in one year alone.
• Developed a strategic and tactical go-to-market sales plan for multiple North American regions, identifying specific target accounts and setting monthly and yearly sales objectives.
• Was solely and directly responsible for $600,000 of diamond merchandise on a daily basis for the purposes of client demo, delivery and sales.
• Involved in every process of B2B sales, from prospect outreach and meetings to order delivery, fulfillment, and invoicing.

The Chess Emporium, LLC
Senior Instructor
May 2014 - August 2017 (3 years 4 months)
Scottsdale, AZ

• Explained abstract & complex analytical problems to a level understandable by elementary school students in a manner in which they understood and exceeded the concepts and applied them in a weekly competitive environment.
• Among basic and advanced chess concepts, I taught my students accountability, discipline, self control, empathy, leadership and good sportsmanship.

Education

Georgia Institute of Technology

Master of Science - MS, Computer Science · (January 2023 - December 2026)

Arizona State University - W. P. Carey School of Business

Bachelor of Applied Science - BASc, Business Data Analytics · (2019 - 2021)
