North Ridgeville, Ohio, United States

Experience

SmartAuger, Inc
5 years 5 months

Founder & CTO
January 2025 - Present (1 year 6 months)
Akron, OH

Founder & CTO of SmartAuger Inc., the holding company behind two operating businesses:

GroundScope Inc. markets compact fully-polarimetric SFCW ground penetrating radar paired with ML models for automated utility detection, classification, and depth estimation. Built for locators and field crews who need answers, not raw radargrams.

SmartAuger Technologies is our Software & Hardware R&D arm. Home to our flagship FATHOM SaaS operating system for subsurface intelligence: an AI-native, hardware-agnostic platform unifying GPR, LiDAR, EM, magnetometry, and records data into a single geospatial layer, providing modern analytics and risk mitigation.

I lead technology vision and deep tech/software execution across both — from RF hardware and antenna design through ML, enterprise SaaS, and defense integrations.

President
February 2021 - February 2025 (4 years 1 month)
Akron, Ohio, United States

International Brotherhood of Electrical Workers (IBEW)
Journeyman Lineman
April 2008 - February 2025 (16 years 11 months)
