Bechtel Certified Document Management Professional (BCERT)

Jancil Saldhana

Senior Data Analyst & AI Solutions Specialist
Abu Dhabi Emirate, United Arab Emirates

Summary

Led end-to-end data integration and analytics initiatives, converting raw project data into actionable insights for strategic decision-making. Designed and deployed advanced Power BI dashboards, enabling real-time performance tracking and data visibility across leadership teams.Developed automated reporting solutions, reducing manual efforts, improving accuracy, and accelerating cross-department reporting efficiency.Defined and monitored data-driven KPIs to evaluate project progress, schedule variances, and cost performance. Partnered with cross-functional teams (cost, planning, construction) to align data structures with business needs and ensure consistency across sources.Mentored junior analysts in data modeling, EVM principles, and predictive forecasting, strengthening analytical maturity within the team.Delivered executive-level insights and forecasting models, empowering leadership with forward-looking decision support.
Brings specialized expertise in digital transformation, leveraging advanced tools and methodologies to drive process automation, optimize workflows, and support data-driven decision-making. Skilled in project and programme support, contract administration, internal quality assurance, system development, and document control management.

AI Deployment | Process Automation | Workflow Optimization | Generative AI
Leveraged enterprise-wide AI adoption to automate routine tasks, allowing teams to focus on high-value strategic initiatives
Power BI | Excel | Python | SQL
Skilled in transforming complex datasets into insights using advanced BI tools and data manipulation techniques for strategic decision-making.
KPI Development & Data Modeling
Expert in designing KPI frameworks, building data models, and establishing performance metrics that align with business objectives.
Forecasting & Predictive Analytics

Develop and implement forecasting models to proactively identify trends, risks, and cost/schedule deviations using data-driven insights.
Dashboard Automation & Reporting
Streamline reporting processes by automating data workflows —reducing manual effort and ensuring real-time, high-accuracy reporting.
Earned Value Management (EVM)
Apply project controls and EVM methodologies to assess cost-efficiency, schedule adherence, and progress performance.
Cross-functional Collaboration
Work effectively with planning, construction, finance, and leadership teams to align technical analytics with operational goals.
