Michael L.

Program Manager, Tech Scouting @ Dcode | Government
New York, New York, United States

Summary

Michael Lustig is a Program Manager on the Government Team at Dcode, where he works to identify emerging technology that can fit federal market needs. He has a wide range of experience working in the early stage startup and VC world. Prior to working for Dcode, he was on the accelerator team at Starburst Aerospace, helping to identify and support emerging startups in the defense and aerospace industries. His wide range of abilities were fostered at the radically progressive Iovine and Young Academy at the University of Southern California, where he studied Arts, Technology, and Business of Innovation, with emphases in Future Design and Venture Creation. Michael is a proud New Yorker, although some might say that he embodies the true bicoastal spirit.

Dcode connects the tech industry and government to drive commercial innovation in the federal market. We offer an acceleration program for tech companies looking to scale in the federal market, training and other programs for government leaders, and opportunities for industry partners and investors — all to improve the way government runs!
