Tom Kilcommons

No 10 Innovation Fellow | AI and Digital at Newton
United Kingdom

Summary

I help senior leaders solve their most complex operational challenges, with operational research, simulation and AI. I architect how data, models and operations fit together, and lead the work end to end. I get to the root of a problem and shape it into something a model can answer, build and iterate the solution with the right specialists, then translate the result into decisions the people using it can act on. I've spent five years at Newton, delivering digital and AI solutions with clients across retail, consumer goods and defence supply chains. I built N-Labs, Newton's internal AI programme, taking over 600 people from spreadsheets, Power BI and local apps to hosted, maintainable software — for many, the first time they'd built software. I've recently begun a six-month Innovation Fellowship at 10 Downing Street, bringing the same approach to a different problem: how frontier technology can deliver better outcomes for people and a more effective state. Whatever I work on, the aim is the same: to leave lasting capability behind, in the teams I lead and the organisations I partner with.

Experience

10 Downing Street
Innovation Fellow
June 2026 - Present (1 month)
London, England, United Kingdom

Fellowship applying AI and modelling to public-sector challenges — embedding with teams across government to rewire the state. Seconded from Newton.

Newton
5 years 4 months

Business Manager & AI Innovation Lead
January 2026 - Present (6 months)
United Kingdom

Leading digital and AI delivery across complex operational challenges, and building Newton's capability to deliver more ambitious work. I lead multi-disciplinary teams – applying simulation, machine learning, and analytical solutions to drive measurable performance improvements.

Internally, I build capability by setting teams up to think differently about what's possible – staying ahead of evolving technology, establishing standards for quality delivery, and providing the tools and partnerships to make it happen. I connect technical depth with commercial outcomes – helping teams deliver ambitious work and clients understand what's possible.

Principal Consultant
April 2025 - January 2026 (10 months)
United Kingdom

Led digital and AI projects across retail and manufacturing – applying simulation, machine learning, and optimisation to deliver measurable operational improvements for clients.

Lead Consultant
January 2024 - April 2025 (1 year 4 months)
United Kingdom

Senior Consultant
October 2022 - January 2024 (1 year 4 months)
United Kingdom

Consultant
March 2021 - October 2022 (1 year 8 months)
United Kingdom

University of Bristol
Technical Support Team Lead
September 2016 - February 2021 (4 years 6 months)
Bristol, England, United Kingdom

Designed and led a new rapid-response technical service to enable students to participate in online learning during Covid-19. Prior to Covid-19, managed an in-person team of technicians to resolve technical service requests, prioritising requests to maintain a high standard of service quality for all customers.

Frazer-Nash Consultancy
Engineer
August 2017 - July 2019 (2 years)

Bristol, United Kingdom

Built a mathematical model in MATLAB to predict aviation flight risk and designed assurance tests for safety critical software. (Year In Industry and Summer Placement).

Tom Kilcommons, Professional Design Services
Consultant
2012 - 2018 (6 years)
Cambridge, United Kingdom

Delivered digital services to small business clients: website design; custom marketing designs for print and digital; and bespoke installation of G Suite (formerly Google Apps) collaboration software.

MTC - Manufacturing Technology Centre
Research Engineer
July 2016 - September 2016 (3 months)
Coventry, United Kingdom

Education

University of Bristol
MEng Engineering Design with Study in Industry, Engineering · (2015 - 2020)

The Perse School
Physics, Geography, Mathematics · (2008 - 2015)
