Anna Bialek

CAIO Forming credible vision, transforming into money & creating wealth through value for you Elite EBTIDA in VUCA environments seen too much, but can share with you AI Embedding Expert
Cracow, Małopolskie, Poland

Summary

Are you looking for an experienced Bussiness and Strategy Expert? You came to the right place. Please let me introduce myself: My name is Anna and during a period of 20 years I have built various businesses across almost all the major branches, participated in multiple projects/programs on different stages of services lifecycle including strategy design, transition, delivery and organizational change management, where I had a pleasure to hold a role in creating, but also capturing value on every stage of services creation cycle for many blue chip Customers worldwide.

During this time I have negotiated contracts, managed 3rd parties, led global changes and multi-stream programs, designed end-to-end lifecycle, participated in global products designs, overlooked countrywide migrations, translated contracts into KPI’s, mapped value streams etc. Those activities took place within the Digital Project&Program Management, Enterprise Strategy, Organizational Change Management, IT Management & Digital Transformation spaces in almost every industry, what allowed me to gather broad experience in building structures supported by motivated teams for Customers in all the branches.

My development path is filled with success stories of Customers, who are of major importance on the market like BP, Shell, Nokia, Lonza or Volvo, for whom I had a chance to improve processes, cut costs and introduce end-to-end efficiency measures. My main focus as a Lead Change/Programme Manager was on Contract Management, Process Excellence and Organizational Change Management, particularly in environments of challenging, large scale implementations and stakeholder ambiguity or resistance, where enabling, behaviours embedding, complex gap analysis and benefits realisation is required.

Cooperation with Customers to tailor suitable solutions according to contract, supporting strategic products development, managing and engaging people across global organizations allowed me to understand complexity of many ecosystems, applying best practices in multilayered political environments requiring high seniority. My approach is defined by application of emotional intelligence onto management.

Experience

AB TRUST
