Justin Masotti

Chief Mission Architect at Anduril
Arlington, Virginia, United States

Summary

Currently employed at Anduril as a Chief Mission Architect

Experience

Anduril Industries
2 years

Chief Mission Architect
May 2025 - Present (1 year 3 months)
Washington DC-Baltimore Area

Lead Mission Operations Engineer
August 2024 - May 2025 (10 months)
Washington, District of Columbia, United States

Lockheed Martin
9 years 10 months

Senior Staff Systems Engineer
December 2021 - August 2024 (2 years 9 months)
Arlington, Virginia, United States

Staff System Engineer
March 2019 - December 2021 (2 years 10 months)
Palmdale, California, United States

Senior System Engineer
June 2017 - March 2019 (1 year 10 months)
Palmdale, California

System Engineer II
August 2016 - June 2017 (11 months)
Palmdale, California

Aeronautical Engineer II
November 2014 - August 2016 (1 year 10 months)
Lexington, Kentucky

Jamco America

Stress Engineer I/II

November 2012 - November 2014 (2 years 1 month)

Everett, Washinton

Preformed classical analysis and structural substantiation of interior monuments and seat development. Created structural substantiation reports for approval by FAA and customers. Projects included:

Boeing 787 Galley:

• Prepared structural substantiation reports for aircraft galleys on Boeing 787-8 and 787-9. A total of 12 customers with more than 75 galleys have been submitted and approved by Boeing and customers.

• Proposed and created several VBA automation tools. Galley automation tools increased efficiency by 60%, largely reducing human errors and suppressed non-value-added steps.

• Created manuals for using developed stress analysis automation tools for new hire training.

• Assisted in creating standardization for substantiation methods for Carts, Panels and restraint devices by developing a database to include all unit test and partial static test results.

First Class and Business Class Seats:

• Assisted in the development and design of seat interface load program which followed seat standardization for Boeing 777 and Airbus A350 aircrafts

Boeing 787 Bar Units:

• Preformed classical analysis of upper fittings and developed report standardization for future use.

• Prepared several test articles and load analysis reports for certification purposes.

ITT Systems

Software Engineer Intern

June 2011 - August 2011 (3 months)

Parsippany, NJ

• Assisted in the development and debugging of XML and C++ scripts to determine satellite telemetry points

• Observed and assisted in the testing of software on satellite payload

• Analyzed satellite payload structure and stress points

• Researched thermal effects on payload electronics in orbit

• Wrote C++ program to convert .tiff images from night vision goggles to .jpeg images and display images on screen.

Education

Embry-Riddle Aeronautical University

Master of Science (M.S.), Systems Engineering and Program Management · (2015 - January 2018)

Embry-Riddle Aeronautical University

Bachelor of Science (B.S.), Aerospace, Aeronautical and Astronautical Engineering · (2007 - 2012)
