Top Skills

Information Technology Infrastructure

System Architects

Large Scale Systems

Languages

English (Professional Working)

Russian (Native or Bilingual)

Certifications

Certificate of an authorized trainer of Kasperky Lab for the course “Security Monitoring and Threat Detection”

Nutanix Certified Master 5 - Multicloud Infrastructure

Nutanix Certified Professional 5

NVIDIA-Certified Associate: AI Infrastructure and Operations

Maksim Lebedev

Senior System Engineer | ELK (Elasticsearch + Logstash + Kibana) | Network (CCNA/CCDA) | Nutanix HCI | DLP | Git | Ansible | Puppet | Jenkins | Kubernetes | Authorized trainer of Kaspersky lab

Abu Dhabi Emirate, United Arab Emirates

Summary

Experienced system administrator;
Network – from solution to cabling and configuration;
Security – Physical and IT security deployment professional;
Electrician – experienced installer;
ELK (Elasticsearch + Logstash + Kibana) – logs guru =)
Soft skills expert.

My motto "do well and it will be good".
I like to debug and analyze code (usually PHP). I will be happy to automate everything.

Ready to help at any time of the day or night.

Experience

Core42

4 years 1 month

Senior System Engineer

November 2023 - Present (2 years 3 months)

Абу-Даби, Объединённые Арабские Эмираты

Joined the HPC (high performance computing) project and I am currently working on it as a technical lead in Operations Department, helping to define and deliver the entire technology stack, applying best practices in this area:

• Team management:
o task setting (SMART) and distributing;
o training (workshops and KB articles);
o expert assistance;
o shift planning.

• Task/incident handling (GPU, service requests):
o Ansible/Puppet (IaC);

o Slurm;
o InfiniBand;
o Nvidia H100;
o Base Command Manager.

• Enhance ITSM processes.

Acted as a representative of the core42 Operations Department at the launch of the Oracle Cloud Infrastructure (OCI) Dedicated Region.
• I am an active operator of the region.
• Manage the region with Terraform.

I am actively involved in the launch of the new GPU data center (third data center in the last two years):

• OPS team representative for all new project related to HPC (AMD, Dell, Qualcomm).
• Leading a team of engineers - developed low-level design for the Shared Management Block of an NVIDIA SuperPOD that meets stringent NIST 800-53 regulatory requirements.

I take part in the deployment of infrastructure services:
o Kubernetes;
o Puppet + Puppet CEM;
o Bitwarden;
o Mail server;
o Atlassian (Jira + Confluence).

Nvidia GPU, Slurm, Dell HGX, NVIDIA Base Command Manager (ex Bright Cluster Manager), InfiniBand, Puppet, Ansible, Containers (Docker, Kubernetes), Elasticsearch, Azure, Oracle operator console, PostgreSQL, Jira, Confluence, Grafana, Zabbix, FreeIPA, VAST.

Senior System Engineer
March 2023 - November 2023 (9 months)
Abu Dhabi Emirate, United Arab Emirates

I was promoted to the position of senior engineer. Moved to the new team "Automation". Continued to focus on processes and workflow (from a business processes perspective). 2023 has become the year of “process optimization”.

System Engineer

January 2022 - March 2023 (1 year 3 months)
Abu Dhabi Emirate, United Arab Emirates

“Enterprise Intelligence and Big Data” team. In a very short time joined the team duty schedule.

Literally a week later, in parallel with working in the EI team (enterprise intelligence in G42 cloud), besides this I began working on a separate project to provide (deploy, configure and maintain) non-cloud infrastructure for a new data center (air-gapped environment) – FreeIPA IDM, HAProxy, DNS, Password management, Ansible AWX, GitLab, Jira, Confluence, Privatebin, Mattermost.

Two months later I took a Atlassian stack for support on an ongoing basis (Jira and Confluence).

Worked in three directions (EI team, shared management block deployment, Atlassian stack) until October 2022, when the preparation of a new data center was completed.

After the delivery of the project, I focused on optimizing business processes, together with new joined Process Governance Senior Specialist (especially on Change Management process, working in tandem, we have significantly improved it).

ECommPay
Senior System Engineer
July 2020 - January 2022 (1 year 7 months)
Москва, Москва, Россия

For three production data centers, 400 developers, we had about 20 engineers. I was on the processing team (core), which consisted of three specialists, including myself.
All internal components of payment processing were in my area of responsibility, from the moment a transaction was received to its full processing.
Ten days a month, I am on duty engineer from the processing team (24h). During duty, I am responsible for all deployments (we have from five to ten deployments per day).
Our whole deployment was "zero error tolerance", so I worked a lot with different departments and development teams, applying DevOps practices.

On the days when I'm free from duty - I go about my tasks from Jira. Basically, these are tasks related to the delivery of logs from applications to the ELK, containerization (primarily PHP and Golang), the introduction of new applications into production and other tasks aimed at improving stability. Cooperate with the security department in terms of building the SOC system and organizing a bug bounty stand (HackerOne).
Day-to-day technologies and products: CentOS, Kafka, NGINX, OpenResty, ELK (Elasticsearch + Logstash + Kibana), Puppet (all infrastructure as code), Ansible + Ansible Tower, Jenkins, AWS (Route 53, EC2, S3), Akamai and Incapsula.

PlatBox Online payments system
Chief Engineer (OPS)
April 2019 - June 2020 (1 year 3 months)
Russian Federation, Moscow

One of the two engineers in the company, so my responsibilities include a fairly large stack of technologies and services (equivalent NetSecOps).

Administration of a large number of servers, from commissioning (installation in DC) to rolling out the latest releases of company products (Erlang, PHP, Python) to the test/prod environments.
- IPMI, ESXi, Debian / CentOS (400+ VM), Nutanix HCI, Windows Server (AD), VPN (OpenVPN, Cisco AnyConnect), PostgreSQL;
- GitLab (CI / CD), Ansible, Docker; Nginx, Keepalive, VIP, HAproxy;
- ELK (Elasticsearch + Logstash + Kibana), Prometheus, Grafana, Zabbix, LibreNMS, PRTG; IPS, IDS, DLP, vulnerability management (Nessus, MaxPatrol 8);

Preparation of infrastructure for PCI DSS audit;

I also have our entire Cisco ASR network (two public / 24 networks and own ASN in BGP), Cisco Nexus, Cisco 9000, Cisco ASA; Derive new metrics in Grafana;

Introduced hyperconvergence into the company, saved many million rubles that they wanted to spend on storage systems. Optimized the existing ELK stack, now the logs take up a dozen gigabytes per day less, despite the fact that the logs are much larger.

I also have equipment purchases, periodic work in the DC, duty (on the operation side), the entire bureaucracy regarding negotiations with providers, DC's, etc.

Q-Center
Engineer
April 2017 - April 2018 (1 year 1 month)
Russian Federation, Moscow

The main task for the position is to select and implement various solutions (as an architect from the integrator), ranging from network equipment, DLP systems, video surveillance systems, industrial access control systems, corporate television, Wi-Fi, LoRaWAN (IoT) to the monitoring system. Periodically conduct a comprehensive audit of IT systems (my main part is networks and information security).

Diagnostics of malfunctions on the customer's network equipment on their own, as well as conducting cases in the technical support of the network equipment manufacturer (Cisco TAC);
Configuring the company's network equipment (switches and firewalls);
Maintaining a partner account of Cisco, as well as planning and fulfilling the requirements of the selected partner specialization;

Pre-sale customer service: negotiating, advising in the selection process, preparing specifications, agreeing specifications with the customer;
- Preparation of materials for internal training (reviews of new equipment, use of commercial Cisco tools);
- Installation and maintenance of equipment on the territory of customers.

Familiar with Cisco Hyperflex, Cisco SD-WAN and DNA, as well as various UCS solutions.

OJSC Nikiet
Engineer
November 2015 - April 2018 (2 years 6 months)
Россия

- Scientific support of integrated utilization of submarines and surface ships, environmental rehabilitation radioactively contaminated facilities and areas.
- Preparation of expert opinions of the course of performance of stages of state contracts.
- Acceptance of the performed works at the entities contractors.

- Development of normative documents.
- Conducting technical and economic examinations of negotiated and wholesale prices.
- Preparation of independent examinations for arbitration court.

GazInginiringAvtomatika
Head of automation department
April 2012 - November 2015 (3 years 8 months)
Moscow, Russia

- Chief installation, commissioning, repair and service of the equipment of Compressor Controls Corporation and Mokveld in the territory of subsidiaries of Gazprom.
- Selection and coordination of the equipment for intended for installation at Gazprom company subsidiaries (power supply cases, a cable, sensors, etc.).
- Formation of partner relationship with suppliers of the equipment, including with foreign (participation in exhibitions, negotiations; business trips across Russia and the USA, for the purpose of the conclusion of contracts of supply of equipment).
- Control and maintenance of the equipment of the company (automatic telephone exchange, system of video surveillance, office equipment, monitoring system of access, WIFI).

Sberbank Srednerussky bank
Senior engineer
August 2010 - February 2012 (1 year 7 months)
Moscow, Russai

// from 09.2007 to 07.2011 I was a student
Duties:
- Maintaining the project of structured cable systems modernization in branches.
- Audit of a branch network of bank for the purpose of identification of mistakes at installation of a network and development of measures for improvement of work of infrastructure and to decrease in expenses on service.
- Interaction with contractors. The solution of arising questions on SCS on objects.
- Drawing up specifications on works on SCS.
- The analysis of budget, project documentation on SCS.
- Control of execution of works and participation in the working and departmental commissions (acceptance of objects), regarding SCS.

- Budgeting. Calculation of plans of the budget the next year and control of plans of development of the current year.
- Initial setup of switchboards Cisco, Huawey (H3C, HP).
- There is an experience with Cisco ACE, CiscoWorks, MS Office (Word, Excel, Visio, Project).
- Monitoring of communication channels during duty shifts. The operational organization and control of works on elimination of problems with channel infrastructure together with communications operators.
- Work with internal clients according to demands in Service desk (SCS, a LAN).

Freelance
Freelancer
May 2009 - August 2010 (1 year 4 months)
Moscow, Russia

// from 09.2007 to 07.2011 I was a student
For the customers I provided a full range of services in the sphere of IT and electro-assembly services:
- Control and equipment service (PBX, network, secure and alarm systems, etc.).
- Laying of cable networks.
- Development of sites (on the basis of "Joomla").
- Administration of computer networks.

My customers were both small offices, and larger companies and institutes. Among my clients were:
- Embassy of Thailand and Mauritania.
- Institute of space researches of the Russian Academy of Sciences.
- Moscow international higher school of business of "MIRBIS" (Institute).
- Global Insurance Broker - Willis.
...

StroyArsenal
Head of department of means of communication
February 2008 - May 2009 (1 year 4 months)
Moscow, Russia

// from 09.2007 to 07.2011 I was a student
- Formation of new department.
- Creation and administration of Internet shop (PBX systems realization).
- Personnel selection.

- Search of potential clients.
- Conducting commercial negotiations with clients in interests of firm.
- Reception and processing of orders of clients, registration of necessary documents.
- Realization of information support of clients.
- Conducting the working and accounting documentation.
- Installation, adjustment of the sold equipment.
- Training of the personnel of the customer, to bases of using the equipment.
- Technical support.
- Management of team of fitters (7 persons).

Lankey Information Systems

The engineer of communication systems

August 2007 - January 2008 (6 months)

Moscow, Russia

// from 09.2007 to 07.2011 I was a student

Duties:

- Installation of difficult technical complexes of communication, networks and telecommunication systems.
- Engineering.
- Installation of low-current systems.

KamchatTechnology

The expert in installation, adjustment and service

August 2006 - February 2007 (7 months)

Kamchatskiy region, Russia

To cover expenses on training in college, I got a job in the company which with understanding treated my need to combine study with work.

Duties:

- Installation SCS (the Structured cable systems).
- Security - fire systems.
- Installation, adjustment of systems of video of supervision.
- Access monitoring systems.
- Installation, adjustment of PBX: Panasonic, Samsung, NEC.

Education

National Research Nuclear University (former Moscow Engineering Physics Institute)

Engineer's degree, Electronics and automatic equipment of physical installations · (2007 - 2011)

College of the Kamchatka state technical university

Technician electrician · (2002 - 2006)
