Jake Tiller

Technical Program Manager (TPM) | Executive Operations | Edge System Ecology | Food As Medicine Advocate | Alpha-Gal Allergy SME |
Lakeland, Florida, United States

Summary

Simplification is systems maintenance.I work on the structural floor layer that decides whether complex systems stay anchored to ground truth or drift. Physical, digital, organizational. The discipline transfers.I have a combined 16 years hybrid background in estate management and C-Suite operations allow me to focus on the bigger picture without losing coherence. I grew up next to my father's thirty-year career as a lead arc flash subject matter expert, so the instinct for physical system safety came first.I use AI as needed to ensure coherency and efficiency. I've published State-Delta Architecture, an open framework for keeping autonomous systems anchored to verifiable local state rather than drifting into confident incoherence.How I help:• Map where internal systems, infrastructure, supply chains, and AI deployments will fail under real-world conditions• Translate technical risk and partner technology into clear decisions for non-technical stakeholders• Operate at the seam between product, customer, and execution; between technical and business teams who don't share a languageBest fit: Technical Program Manager, Solutions or Ecosystem Architect, or Executive Operations/Chief of Staff. Deploying custom sandboxes, data governance lattices, and operational risk mitigation for agentic systems. and coordinating the partnerships and open-source contributions that surround them. I am open to Florida, NY, Boston, the Bay Area, or remote.Outside the technical work: culinary school graduate focused on practical resilience — food preservation and sustainable community resource models. I also run a large community that vets research on health and biological sensitivities. Same discipline: keep what's verified, set aside what isn't. I've had Alpha Gal Syndrome for 18 years. I've lead the online AGS community, emphasizing on neutral information sharing without scams or misinformation. Plain-English thesis: If you don't build loops that force the person who makes the mess to feel the weight of the bag, the system runs itself off a cliff. Ground truth isn't polite;

it’s the raw moment when the paperwork fails and the physical consequence arrives.

Experience

UHNW CEOs and Family Offices
Executive Operations & TCM
May 2021 - Present (5 years 2 months)
United States

Direct line-of-sight operations for UHNW principals across tech, finance, and real estate. The role sits at the intersection of executive support, risk management, and strategic analysis — the work of being the person who notices what’s about to break before it does, and translates that into decisions principals can act on quickly.
Core responsibilities:
• Designed and maintained operational protocols for principals managing high-volatility schedules, properties, and assets
• Delivered strategic briefs on geopolitical, supply chain, and market risk relevant to principal interests
• Managed cross-jurisdictional logistics with strict privacy, security, and discretion requirements
• Coordinated between principals, technical staff, and external advisors on complex multi-stakeholder decisions
• Built risk and resilience assessments for properties, holdings, and operational continuity
Operating in this environment for over a decade has been an unusual education in how decisions get made at the highest levels of complex systems — and where they go wrong.

Private UHNW Family
Operations Team Lead
August 2024 - September 2025 (1 year 2 months)
Ocean Ridge, FL

Private UHNW Family
Private Chef (Fill-In)
March 2024 - June 2024 (4 months)
Palo Alto, California, United States

Kali Restaurant

Chef
October 2023 - March 2024 (6 months)
Los Angeles, California, United States
