Darin DiTommaso

Vice President of Engineering GE Aerospace Defense and Systems
Cincinnati Metropolitan Area

Summary

I'm an experienced leader building and supporting diverse, talented and enthusiastic teams focused on safety and our customers . Our engineering team partners with manufacturing to design, deliver, and support state of the art propulsion, electrical power, and avionics systems.

Experience

GE Aerospace
Vice President of Engineering GE Aerospace Defense and Systems
July 2023 - Present (3 years)

Leading GE Aerospace's Defense and Systems engineering team to design, deliver, and support state of the art propulsion, electrical power, and avionics systems.

GE
Vice President Of Engineering GE Edison Works
January 2021 - July 2023 (2 years 7 months)

Leading the design, development and support of our military propulsion product portfolio, both existing core products and next generation products.

NASA - National Aeronautics and Space Administration
Vice Chair, Aeronautics Committee NASA Advisory Council
May 2019 - February 2022 (2 years 10 months)

Subject matter expert serving to advise the administration on matters related to aeronautics and space

GE Aviation
32 years 1 month

Vice President Military Engineering
June 2019 - December 2020 (1 year 7 months)

Leading the design, development and support of our military propulsion product portfolio, both existing core products and next generation products.

GM Advanced Technology Operation
January 2018 - June 2019 (1 year 6 months)
Cincinnati, Ohio

Leading teams developing a suite of technologies supporting both new and existing product lines: digital solutions, advanced mechanical designs, aerodynamics, mechanical systems analysis, application of advanced materials and design for additive manufacturing.

GM Digital Services and Solutions
March 2013 - January 2018 (4 years 11 months)
Cincinnati, Ohio

Established GE Aviation's software and data science/analytics team, and led GE Aviation's vehicle health management P&L. The team developed prognostic and operations software applications, leveraging broad data sets and analytics, and designed avionic solutions for commercial and military aircraft.

GM Advanced Design Methods
March 2012 - March 2013 (1 year 1 month)
Cincinnati, Ohio

Led a team across several GE businesses driving state of the art engineering analysis methods and associated commercial software strategies.

GM Engineering Resource and Strategy Development
February 2011 - March 2012 (1 year 2 months)
Evendale Ohio

Led the strategy to resource and develop engineering talent in support of the development and certification of our Leap, Passport, Honda, and GE9X product lines.

Executive - Prelimary Design and Systems Technology
August 2005 - February 2011 (5 years 7 months)
Evendale Ohio

Led the commercial and military preliminary design efforts focusing on the Leap, GEnx, Passport, Honda, and GE9X engine programs as well as a variety of advanced military programs including adaptive engine products. Responsible for the system level mechanical and aero-thermal design as well as associated technology maturation programs. A domestic and global team specializing in disciplines such as mechanical design and weight, acoustics, aerodyamics, rotordynamics, aeromechanics, airplane performance and cost analysis.

Engineering Leader

December 1988 - August 2005 (16 years 9 months)

Evendale Ohio

Various roles of increasing responsibility in the engineering division at GE Aviation including performance engineering, remote diagnostics and prognostics, Six Sigma Black Belt, design engineering, as well as powerplant and services engineering for fielded products.

Education

Purdue University

Bachelor's of Science, Aerospace, Aeronautical and Astronautical Engineering

Xavier University

Master of Business Administration (MBA)
