INVESTIGATING THE BRUSHY CREEK SUSPECTED IMPACT CRATER, ST. HELENA PARISH, LOUISIANA

Andrew Herr

Geologist | Environmental Consultant | AI/ML Researcher |
New Orleans, Louisiana, United States

Summary

Geologist and environmental consultant with interests in cybersecurity, OSINT. remote sensing, earth observation, planetary science, environmental justice, and human rights. I'm a lifelong learner always looking to expand my skills. Outside of work, I love creating art, silver/gold jewelry smithing, music production, and taking things apart.

Experience

Investigate The Unknown
Science Advisor
January 2024 - Present (1 year 7 months)

Advising the team on scientific practices to ensure the integrity and reliability of data collection and analysis.I help guide the project’s direction in its aim of demystifying the unknown through scientific inquiry.

Project Nanu is a citizen science network for reporting and researching unexplained phenomena, aiming to bridge the gap between the public and scientific investigation.
