Top Skills

Tinymovr Brushless Servo Motor Controller
Embedded Systems
Controller Area Network (CAN)

Languages

Hindi (Elementary)
English (Elementary)

Certifications

Mathematics for Machine Learning
Programming for Everybody (Getting Started with Python)
Machine Learning with Python

Aman Pandey

Robotics Engineer @ IISC Bangalore | Building intelligence for robotics
Karnataka, India

Experience

Robert Bosch Centre for Cyber-Physical Systems @ IISc
Robotics Engineer
January 2025 - Present (1 year 1 month)
Bengaluru, Karnataka, India

Control One | AI Startup
Robotics RnD Engineer
October 2024 - November 2024 (2 months)
Bengaluru, Karnataka, India

Solcept AG
Embedded Software Engineer
May 2024 - August 2024 (4 months)
Switzerland

Worked on unit tests and UML documentation for a C++ communication stack library for embedded targets, designed a memory manager for a communication protocol, upgraded and deployed the unit testing framework and tests to an STM32.

Project MANAS
2 years 5 months

Technical Head
August 2023 - August 2024 (1 year 1 month)
Manipal, Karnataka

Leading an interdisciplinary team of 50 undergrads in the end-to-end development of an Autonomous Payload Delivery Drone (SUAS) and Autonomous Self Drive UGV (IGVC), winning 1st at Design Challenge IGVC 2024

Team Captain | IGVC'23
December 2022 - August 2023 (9 months)
Manipal

Led a team of 15 in developing an Autonomous UGV for IGVC, integrating GPS, IMU, LiDAR, and 3d camera systems into a ROS-based stack for

autonomous driving. Achieved 3rd place internationally in the AutoNav challenge.

Team Member
April 2022 - December 2022 (9 months)
Udupi, Karnataka, India

Worked on autopilot control systems, onboard communications, tuning, and the payload drop mechanism for a 7ft winspan hexacopter for the SUAS 2023 competition, working under the SnA subsystem

GitWit
Generative AI Engineer
February 2024 - May 2024 (4 months)
San Francisco Bay Area

Contributed to GitWit, an AI assistant that takes the grunt work out of full-stack software development using NLP, generative agents, and integration with SDE tools such as git and VS Code.

Tinymovr
Project Intern
July 2023 - August 2023 (2 months)
Komotiní, Eastern Macedonia and Thrace, Greece

Worked on the development and testing of ROS integration software packages for Tinymovr motor controllers

---

Education

Manipal Institute of Technology
Bachelor of Technology - BTech, Electrical, Electronics and Communications Engineering · (October 2021 - May 2025)
