Kyle Briggs

F/A-18 Super Hornet Pilot | Naval Aviation Systems Integration | AI & Autonomous Systems Focus | TS/SCI
Hanford, California, United States

Summary

Naval Aviator specializing in advanced systems integration and tactical instruction in the F/A-18 Super Hornet community. Expertise in carrier aviation technology, precision landing systems, and multi-platform integration.

Current Impact:
• Instructor for carrier qualification and advanced systems
• 1000+ flight hours leveraging advanced combat systems
• Strategic deterrence operations in Indo-Pacific theater

Focus Areas:
• Defense technology innovation
• Autonomous systems development
• AI integration in military operations
• Next-generation air combat systems

Active in AI/ML learning communities, focused on autonomous systems development and defense innovation. TS/SCI clearance.

Open to connecting with professionals in defense technology and military AI integration.

Experience

Defense Tech Signals
Founder
February 2025 - Present (6 months)

OPFOR
Assistant Producer
June 2025 - Present (2 months)

US Navy

9 years

F/A-18 Instructor Pilot

August 2024 - Present (1 year)

Lemoore, California, United States

• Lead advanced systems integration training for F/A-18 carrier qualification pipeline

• Specialize in complex avionics systems instruction

• Develop and deliver technical curriculum for next-generation naval aviators

• Focus on simulator-based training and systems optimization

• Integrate AI/ML concepts into traditional training methodology

F/A-18F Super Hornet Pilot

May 2021 - August 2024 (3 years 4 months)

Lemoore, California, United States

Led 10-member team managing TS/SCI program, achieving 100% readiness with zero deficiencies

• Selected as Lead Landing Signals Officer (1 of 4) for carrier integration operations

• Executed complex systems integration during Indo-Pacific deterrence missions

• Developed expertise in advanced avionics and autonomous landing systems

• Awarded Navy and Marine Corps Achievement Medal for technical program management

• Managed critical aviation systems safety program for carrier-based operations

Student Naval Aviator

August 2016 - May 2021 (4 years 10 months)

Kingsville, Texas, United States

Flight Instructor

May 2019 - December 2019 (8 months)

Kingsville, Texas, United States

• Selected as First Tour (SERGRAD) Instructor from highly competitive candidate pool

• Developed expertise in systems integration and advanced flight control interfaces

• Qualified in all phases of Navy intermediate jet training systems

• Specialized in technical systems instruction and performance optimization

Education

United States Naval Academy

Bachelor of Science - BS, Applied Mathematics

Creighton Preparatory School

Naval Postgraduate School

Data Science Certificate, Data science · (January 2025 - December 2025)
