Byron Gregg

Principal Engineer @ Vaire Computing | PhD ECE Student @ Portland State | Former Intel Engineer
Portland, Oregon, United States

Summary

Dedicated, hardworking, and experienced Electrical and Computer Engineer with a passion to be a part of teams creating disruptive technologies. Hands-on experience and education in computer architecture, digital circuit design, silicon manufacturing technologies, system testing and validation, fault isolation and failure analysis, and design automation software implementations. Resourceful, analytical and detail-driven with capabilities in completing multiple projects with competing deadlines. Strong technical and methodical aptitude with an innate ability to analyze, coordinate and synthesize data. Additional expertise in maintaining safety methods and practices. Strong interpersonal and teamwork skills, highly motivated and eager to take on technical challenges.

Experience

Vaire Computing
Principal Engineer
January 2025 - Present (1 year)
Portland, Oregon, United States

Sunday's Dream LLC
Managing Partner
August 2021 - Present (4 years 5 months)
Portland, Oregon, United States

This is my ex-wife's stained glass studio business that we started together (www.sundaysdream.com). I'm no longer actively helping here bit in my spare time, I might support business and financial matters, building equipment and furniture that can be seen in her studio, and picking up and transporting supplies and materials.

Intel Corporation
8 years 10 months

EDA Tools Hardware Engineer

October 2023 - December 2024 (1 year 3 months)
Hillsboro, Oregon, United States

[Title Changed from SoC Design Engineer - Same Team] Designs, implements, verifies, and supports the enablement and adoption of hardware design tools, flows, and methodologies. Defines methodologies for hardware development related to technology node and EDA tool enabling. Creates and verifies unique hardware designs, assembles design platforms, and integrates components into hierarchical systems to provide deployment coverage for end-to-end EDA tool testing on new technology nodes. Develops, tests, and analyzes engineering design automation tools, flow, and methodologies to improve efficiency and optimize power and performance. Supports development and enhancement of platforms, databases, scripts, and tools flows for design automation. Builds deep understanding of digital design, verification, structural and physical layout, full-chip integration, power and performance, clocking, and/or timing to enhance future TFM development. Collaborates with EDA vendors on defining and early testing of next-generation design tools.

SoC Design Engineer
August 2021 - October 2023 (2 years 3 months)
Hillsboro, Oregon, United States

Product Development Engineer
March 2018 - August 2021 (3 years 6 months)
Hillsboro, Oregon

Manufacturing Technician
March 2016 - March 2018 (2 years 1 month)
Hillsboro, Oregon

Southern Kern Unified Schl Dst
1 year 5 months

Avid Tutor
February 2015 - January 2016 (1 year)

Worked with a team of AVID tutors to pass-down prior knowledge to pupils and helped them reach their academic goals.

Substitute Para Educator
September 2014 - January 2015 (5 months)
Rosamond, CA

Observed and assisted students in various class room settings. Worked with teachers to ensure students were receiving the best assistance needed.

The Citizenre Corporation

1 year 8 months

Territorial Logistics Director

June 2013 - January 2014 (8 months)

Lead a team of Territorial Logistics Managers that organized and analyzed data, serviced customers, sold photovoltaic systems, audited photovoltaic system designs, and were responsible for sensitive company and customer information. Performed monthly evaluations and train, coach and support employees and new management.

Territorial Logistics Manager

June 2012 - June 2013 (1 year 1 month)

San Diego, CA

Audited solar (Photovoltaic) systems and recorded client information. Maintained and generated documentation of the design and installation of the solar systems.

Education

Portland State University

Doctor of Philosophy - PhD, Electrical and Computer Engineering · (September 2023 - June 2026)

Portland State University

Master of Science - MS, Electrical and Computer Engineering · (2017 - 2019)

DeVry University

Bachelor of Science (BS), Electronics Engineering Technology · (2013 - 2016)

Rosamond High School

Diploma · (2009 - 2013)
