Technological Innovation

## Certifications

Level III Certification in Systems Planning, Research, Development and Engineering

## Honors-Awards

Navy Meritorious Civilian Service Award
Medal for the Global War on Terrorism
Navy Distinguished Civilian Service Award
Scientist of the Year Award
Navy Superior Civilian Service Award

# David Stoudt

Executive Director of the Directed Energy Professional Society (DEPS); President/Owner Antaeus Technical Solutions LLC; Past Senior Executive Advisor/Fellow for Directed Energy, Booz Allen, 2016-2025;
Bradenton, Florida, United States

## Summary

I have had significant hands-on experience in developing and fielding technology from concept formulation, through research and development, field-testing and operational deployment, to include combat operations. I have performed from the basic research through policy level, and my accomplishments have been recognized locally, nationally and internationally at each level. I have been lucky enough to grow and lead talented and successful technical teams throughout my career.

## Experience

### Directed Energy Professional Society
Executive Director
August 2025 - Present (11 months)
7770 Jefferson St NE, Albuquerque, NM 87109, US

The Directed Energy Professional Society (DEPS) fosters the research, development and operational transition of directed energy (DE) technologies, including high energy laser (HEL) and high power microwave (HPM) technologies, for national defense and civil applications through professional communication, education and outreach.

Goals:

- Encourage national interest in DE
- Foster communication within the DE community
- Enhance DE education
- Recognize outstanding DE contributions
- Publish and archive DE achievements
- Enhance DE outreach
- Encourage DE manufacturing

Activities

Sponsoring:

- Symposia, Conferences and Workshops in DE
- Professional Development Short Courses on DE Topics
- Exhibitions for Manufacturers, Government, and Academia
- Graduate student research grants focused in DE technologies
- STEM outreach with middle school and high school students

Recognizing:

- Excellent DE technical papers
- Contributions of DEPS Fellows

Publishing:

- Technical Journal of Directed Energy
- Symposia, Conference and Workshop Proceedings
- Books on DE technologies

### Antaeus Technical Solutions LLC

President/Owner

January 2016 - Present (10 years 6 months)

Bradenton, FL

I have over 35 years of experience from the laboratory, field-testing, and operational levels, through the policy level, and my accomplishments have been recognized locally, nationally and internationally at each level. I use that experience to further the objectives of any organization with which I am associated. I employ those skills that I developed as a visionary and a

results-oriented senior executive in the Department of the Navy, to work with customers to focus project execution in order to ensure timely, cost effective, and useful analysis, technologies and capabilities are delivered to the customer on time and in budget. I have strong technical skills and experience in pulsed-power systems, high-power radiofrequency systems, high-energy lasers, semiconductor processing, foreign material assessments, program management, sponsor engagement, international technical collaboration, strategy development, and developing and presenting oral/ written communications.

### Booz Allen Hamilton

Senior Executive Advisor/Engineering Fellow for Directed Energy

March 2016 - July 2025 (9 years 5 months)

Dahlgren, Virginia, United States

A Senior Executive Advisor (SEA) based in our Dahlgren, VA office as part of the firm's Navy and Marine Corps line of business, with an emphasis in Directed Energy. Also named as a Booz Allen Engineering Fellow for Directed Energy. Serving as a leader and advisor on Directed Energy weapons development, broad business development in the Navy Warfare Centers, and guiding the firm's Digital Engineering and Model-Based Systems Engineering (MBSE) growth in support of the Navy and Marine Corps.

### Directed Energy Professional Society

President

February 2018 - May 2024 (6 years 4 months)

HQ Albuquerque, NM

The President is selected by the Board of Directors and serves as the Chair of the Board of Directors. The President has overall responsibility for the strategic direction of the corporation, and with the Board of Directors, works closely with the Executive Director to ensure this direction is implemented.

### Reginald Victor Jones Institute

Member Of The Board Of Advisors

January 2022 - December 2023 (2 years)

Washington DC-Baltimore Area

Member of the Institute's board of advisors, whose mission is to advance the art and science of electromagnetic spectrum operations (EMSO) in all domains by driving innovative, forward thinking, and leap-ahead analysis, studies, and recommendations in order to achieve EMSO superiority for the United States and coalition partners.

### Naval Surface Warfare Center Dahlgren Division
Distinguished Engineer for Directed Energy [ST]
August 2004 - December 2015 (11 years 5 months)
Dahlgren, Virginia

- A proven track record of providing sound results-driven technical strategic leadership that led to the establishment of world-class directed-energy programs, personnel, and facilities at NSWCDD.
- Appointed by the Secretary of the Navy (SECNAV) to be the Navy's Distinguished Engineer for Directed Energy (ST), at NSWC Dahlgren Division, August 2004.
- Warranted July 2008 as the NAVSEA Technical Authority Warrant for Directed Energy and Electric Weapon Systems, such as high-energy laser (HEL) weapon systems, the Electromagnetic Rail Gun Weapon System, high-power microwave (HPM) weapon systems, and electromagnetic launch of weapons.
- Established several prototype weapon development efforts to support Operation Iraqi Freedom (OIF) to help mitigate the impact of Improvised Explosive Devices (IEDs). One such system, Neutralizing IEDs with Radio Frequency (NIRF), was developed and deployed in less than 18 months from receipt of funding. I technically directed the development of the second NIRF system that deployed to Iraq in 2011.
- Helped established and technically direct a number of HPM and HEL technology programs, including; airborne electronic attack, counter-IED, HPM and HEL lethality efforts, and the Navy's Laser Weapon System (LaWS) that is currently deployed on the USS Ponce.
- More than fifteen years' experience as the senior national representative to NATO Task Groups evaluating directed energy weapon effects on C4ISR systems. Serves as the Member At Large for Directed Energy, NATO S&T Organization, Systems and Concepts Integration Panel.
- Invited to speak, and chaired sessions, at international symposia on laser interactions with material, pulsed-power technology, and HEL and HPM effects and modeling.
- Helped to establish and oversee directed energy technology development programs, which are currently executing more than $50M per year at Dahlgren, and grow the government technical workforce to about 150 Navy civilians.

### Office of the Deputy Under Secretary of the Navy (Policy)
Senior Director, Capabilities and Concepts
December 2011 - January 2015 (3 years 2 months)

Pentagon (5E171)

- Successfully took on the challenge of standing up a new organization within the Department of the Navy (DON) Secretariat that was chartered to assess naval programs, technology development and warfighting concepts, and analyze their implications for future naval capabilities. I was responsible for directing a very talented and motivated team of fifteen individuals comprised primarily of Navy Captains (O6) and Commanders (O5), and GS-15 and GS-14 civilian analysts.
- Directly engaged with senior Navy decision makers on the DDG-51 Flight III design to make certain that sufficient power generation would exist to provide power to future capabilities, such as directed energy weapons, and ensure that the ship would reach its 40 year expected service life.
- Directed and oversaw the management and operation of three Federal Advisory Committee Act (FACA) panels. The primary panel is the SECNAV Advisory Panel (SNAP), with two subpanels; the Naval Research Advisory Committee (NRAC), and the SECNAV's Advisory Subcommittee on Naval History (SNAS).
- Provided DUSN(P), ASN(RDA), and DASN(RDT&E) expert review of highly-complex technical issues for decision support.
- Selected as the Executive Secretary of the Naval Directed Energy Steering Group chartered by the Under Secretary of the Navy to develop the DON Vision, Strategy, and Roadmap for Naval directed-energy weapons. This effort resulted in the DON's first-ever Directed Energy Vision for U.S. Naval Forces and the U.S. Naval Directed Energy Strategy. The near-term roadmap is currently in final review.
- Served as DUSN(P)'s representative to the Defense Space Council, the principal advisory forum to inform, coordinate and resolve space issues for DoD.
- Served as the Executive Secretary for the Naval Non-Acoustic ASW Steering Group, and the Naval Space Board.
- Served as a DUSN(P) representative in the Navy Acquisition Gate Review process and the Resources and Requirements Review Board (R3B).

## US Navy

### Nuclear Reactor Operator (ET1/SS/DV)

August 1978 - August 1984 (6 years 1 month)

Served aboard the USS Finback (SSN 670) as a Submarine Qualified Electronics Technician First Class/Reactor Operator/Navy SCUBA Diver/ Periscope Photographer.

## Education

### Old Dominion University

Doctor of Philosophy (Ph.D.), Electrical and Electronics Engineering · (1992 - 1995)

### Massachusetts Institute of Technology

Seminar XXI, Foreign Politics, International Relations, and the National Interest · (2012 - 2013)

### Old Dominion University

Master of Science (M.S.), Electrical and Electronics Engineering · (1988 - 1989)

### Old Dominion University

Bachelor of Science (B.S.), Electrical and Electronics Engineering · (1984 - 1987)

### Harvard University

Program for Senior Executives in National and International Security, Kennedy School of Government · (2000)
