#EmbraceTheChange

Zweibrücken, Rheinland-Pfalz, Deutschland

Zusammenfassung

Leading AI innovation at embraceableAI with a focus on developing practical, enterprise-ready language model solutions. Currently heading the GRAG (German Retrieval Augmented Generation) project, a collaborative effort to advance German-language AI capabilities through specialized model development and fine-tuning.

Passionate about making advanced AI technologies accessible and efficient for business applications. Experienced in developing and implementing RAG systems, language model fine-tuning, and creating scalable AI solutions for real-world deployment.

Driving partnerships between industry and research institutions to advance German language AI technology. Committed to open innovation and knowledge sharing in the AI community.

Core focus areas:

- Language Model Fine-tuning
- Retrieval Augmented Generation (RAG)
- German Language AI Systems
- Enterprise AI Solutions
- Open Source AI Development
