Tosin Omolewu

Head of Product Management & Technology | Digital Transformation Leader | AI-Driven Product Innovation
Irvine, California, United States

Summary

ABOUT
Product and Technology Leader with 20+ years of experience driving digital transformation, product innovation, and building operational functions from the ground up at global e-commerce, telecommunications, media, and healthcare enterprises.

Proven track record in building functions from the ground up and setting up process mechanisms, optimizing product life cycles, and scaling cross-functional teams to drive business growth. Adept at building and managing high-impact products, fostering collaboration across diverse teams, and delivering significant cost savings and operational efficiencies.

- & : Led the transformation of Amazon.jobs, targeting multi-million-dollar savings over three years and cutting hiring costs significantly. Delivered AI-based job matching and recruiting tools, improving recruiter efficiency and cutting candidate drop-off rates.

- : Managed a 16-product portfolio in Candidate Experience & Technology at Amazon, overseeing the full lifecycle from strategy to execution. Led Comcast's European market expansion by launching Sky Hub broadband devices and launched next-gen MDU products.

- : Launched Inlife Engineering at Comcast, resolving field defects and reducing customer escalations. Established the Software Quality Assurance (SQA) organization and standardized PMO practices at SeaChange.

- : Scaled teams from 3 to over 80 in 1.5 years at Amazon, leading critical, high-visibility programs. At Comcast, co-founded the BENgineers(HER) ERG, retaining 100% of high-performing black female engineers and increasing their promotions by 10%, enhancing DEI initiatives.

- & : Standardized device certification processes at Comcast, enhancing security and regulatory compliance. Led the TL9000 certification process at SeaChange, securing new business opportunities and enhancing product quality.

Experience

PriFi Tech Management Consultants
Managing Partner
December 2022 - Present (3 years 3 months)
Irvine, California, United States

C-suite advisor delivering end-to-end digital transformation for pharmaceutical and healthcare businesses, with a focus on growth, P&L optimization, operational efficiency, and platform innovation. I help clients identify new market opportunities, modernize their systems, streamline compliance, and scale with confidence through tailored product and technology strategies.

- Sourced and secured new pharmacy consulting engagements by leveraging peer networks and industry referrals. Built trust with owners and operators by uncovering core operational challenges and positioning digital transformation as a scalable and sustainable growth lever.
- Led the design, development, and launch of a user-facing digital platform enabling doctors, clinics, and patients to manage prescription and OTC orders, featuring integrated inventory control, compounding workflow automation, profile management, and built-in data security and compliance protocols.
- Migrated a pharmacy client’s e-commerce operation to Shopify, improving site performance, boosting SEO, and increasing lead generation by 500%.
- Retained 100% of clients, driving contract renewals and expanded scope by consistently delivering measurable value and trusted advisory partnerships.
- Directed cross-functional collaborations to deploy tailored enterprise solutions that streamlined payroll, inventory, and audit processes.
- Automated payroll, cutting audit prep from 14 days to less than 1, and eliminated inventory loss through advanced tracking and monitoring.
- Revamped an online store and improved customer satisfaction by 68%.
- Navigated complex healthcare regulations including HIPAA, DEA EPCS, GMP, and CMS compliance, securing licensing and third-party integrations across payments, delivery, and operational systems.

GitHub

Head of Code Intelligence, Copilot Productivity

December 2024 - July 2025 (8 months)

Irvine, California, United States

Leading GitHub's Code Intelligence team under Copilot Productivity, focused on delivering AI-native developer experiences across github.com. I joined during a pivotal phase to help stabilize and scale critical engineering systems powering Copilot and semantic tooling.

- Provide strategic leadership and delivery oversight for key GitHub.com experiences including GitHub Copilot Chat, GitHub Code Search, and other core AI-first and AI-assisted productivity tools embedded across the developer workflow.
- Supported the final phase of the GitHub Copilot Free rollout, contributing to operational readiness and cross-functional alignment for a successful release.
- Driving execution and alignment across initiatives such as AI-based agentic workflows and context-aware tooling to improve developer efficiency at scale.
- Collaborating with senior leaders across Engineering, Product, and Design to evolve how GitHub supports AI-augmented development across surfaces and services.
- Helping advance GitHub's Model Context Protocol (MCP) strategy, which enables smarter orchestration and use of foundational models across Copilot experiences.
- Developed and rolled out scalable intake and execution frameworks that empower sustainable team ownership, minimize cross-org friction, and support high-impact product delivery.

Amazon

Head of Product - Candidate Experience and Technology

2021 - 2024 (3 years)

California, United States

Led transformation of Amazon.jobs to Amazon Careers, an AI-driven site with over 200M registered users and 16 cloud-based products, that cut hiring costs by millions annually. Led a global rollout of an AI-powered recruiting product and expanded the product portfolio to 16, achieving significant savings and improving recruiter efficiency.

- Scaled the team from 3 to 80+ in 1.5 years to support high-visibility programs.
- Deployed AI-driven solutions for automated profile matching and personalized role recommendations, reducing candidate drop-offs significantly.

- Developed a gamified employee referral system, saving millions in recruitment fraud and improving high-performer placements.
- Migrated Amazon’s job platform to a new CMS, reducing operational costs and enhancing UX through AI-powered recommendations.

Comcast

8 years

Senior Director

2018 - 2021 (3 years)

Philadelphia, Pennsylvania

Led Comcast’s broadband device strategy and founded the "In-Life Engineering" team, significantly improving device lifecycle management, reducing operational costs, and enhancing customer satisfaction.

- Drove Comcast’s migration to cloud-based video solutions, cutting costs and optimizing streaming performance.
- Drove Comcast's European market entry by launching innovative broadband devices post-Sky UK acquisition.
- Co-founded BENgineers(HER) ERG, leading a DEI initiative that retained 100% of high-performing black female engineers.
- Standardized broadband device certification, optimizing protocol adherence, and reducing security vulnerabilities by 20%.

Director, Product Management

2016 - 2018 (2 years)

Served as Product Leader for all flagship and legacy commercial device products. Defined strategy and execution plans for product launch, market introduction and product maturity up until EOL. Defined threat and response standards for broadband devices and cybersecurity certification proposal for new devices by bringing top 5 broadband companies across North America together with 3rd party test and qualification vendors. Created core team and co-authored draft agreement across coalition. Aligned cost, testing and scheduling agreements with vendors and aligned on amendment process.

Senior Manager, Product Development Engineering

2013 - 2016 (3 years)

Philadelphia, Pennsylvania

Built the Broadband Inlife team that owned post-deployment support of Comcast devices and drove tighter collaboration between product, development, QA and field support engineering teams. Reduced field defect backlog by ~60% and set up mechanisms that sustained continuous reduction

in field escalations which dropped by an average of 19% YoY. Spearheaded business initiatives on device platforms that drove increased subscriptions, from vision and design, to implementation and deployment. Defined, designed and delivered first cloud-based device data store for use by all internal teams from engineering to customer support. Supported the continuous improvement, automation of service requests and maturity of the software/database systems that powered the premise technology device data center.

SeaChange International

9 years

Program Director, Professional Services

2011 - 2013 (2 years)

Fort Washington, Pennsylvania, United States

Oversaw SeaChange’s expansion into South America and led the establishment of the Quality Assurance team, achieving TL9000 certification and significantly enhancing product quality for major clients like Comcast and Charter.

- Originated and closed $5M+ in new business across LATAM by leading pre-sales solution design, building executive relationships, and customizing delivery platforms for regional needs. This included securing a $3.8M multi-year contract with VTR Chile, which marked SeaChange’s entry into the Latin American market and established a foundation for future growth.
- Established the Software Quality Assurance team, reducing defect backlog by 40% within the first year.
- Standardized PMO practices, improving forecasting and reporting while transitioning SeaChange to agile development.

Senior Engineering Manager, QA

2004 - 2011 (7 years)

Fort Washington, Pennsylvania, United States

Proposed, developed, implemented, integrated, and maintained the quality assurance system, including processes and policies, tools, and measurements, for the SeaChange PA division. Also established and coordinated the integration and distribution of several standardized processes, tools and templates with different divisions for use across the organization. Core member of the SeaChange TL 9000 team and the SeaChange TL 9000 internal audit team. Also solidified role as the TL 9000 representative for SeaChange PA. Supervision and management of the central laboratory for SeaChange PA which consists of headend equipment, VOD servers, and set

top boxes which support end-to-end testing of application solutions (VOD, games, and more) in the interactive television space.

Ricardo Inc
Snr Software Manager
2001 - 2004 (3 years)
Burr Ridge, Illinois, United States

Designed and implemented the Ricardo License Manager™ using outsourced licensing engine from Macrovision (Flexlm). This includes the origination, execution and management of the license manager, including the encryption mechanism for all Ricardo Software solutions. Developed, tested and supported cross-platform applications that ran across multi-platforms including Linux RedHat, HP, DecAlpha, WindowsNT4, UNIX, Sun-Solaris, and IBM. Acted as the SME in using Rational ClearCase and ClearQuest to perform the needed configuration management and version control tasks for a complex but organized set of UNIX and Windows workspaces at the Chicago division of Ricardo.

HummingBox Inc.
Software Engineer
2000 - 2001 (1 year)
Pasadena, California, United States

Analyzed, developed, engineered, configured, and extended Windows-based wireless applications using different protocols to deliver information to leading WAP, Palm and other wireless devices. Worked directly with CTO to enhance the marketability of products by influencing the product architecture and design towards the satisfaction of critical business requirements. Acted as SME of HummingBox products and solutions for CFO of company during meetings and discussions with potential and current investors and clients.
