Bryan S.

Director of Strategic Initiatives | Defense Innovation | Ecosystem & Partnerships
San Francisco Bay Area

Summary

I'm a sUAS strategist and integrator with over twenty years of experience in public safety, counterterrorism, leadership and technology implementation for tactical and multi-agency Task Force operations. My experience deploying technology alongside tier one operators – including COTS unmanned systems – shaped my understanding of what operators need (and don't need) in the field. Serving as Director of Strategic Initiatives for Orqa, I optimize interoperability and strategic partnerships to meet the operator need.Since early 2022, I have been supporting Ukrainian rapid adaptation of commercial off-the-shelf (COTS) technology into effective systems to overcome the full-scale invasion by russia. I assessed and optimized a variety of existing western systems for increased efficacy in combat conditions. Iterative speed, improvisation, and direct experience with combat operators in the field have informed my approach to defense innovation – guiding principles that continue to inform my work at Orqa and beyond.So others may live.

Experience

Orqa FPV
1 year 7 months
