Marine Special Operations Support Marine of the Year

Randall Parkes, MBV

Mission Operations | USC Marshall Alumni | Retired Marine

San Diego Metropolitan Area

Summary

I'm a retired Marine Corps Veteran who spent my career as a Senior Enlisted Leader, guiding teams of Marines and Sailors through some of the most challenging and dynamic environments around the world. I bring that same mindset into the private sector. My core strengths include building new business opportunities, talent development, cultivating positive culture, strengthening customer relationships, and navigating complex negotiations. I enjoy bringing people together, aligning teams, and creating environments where others can win.

Today, I'm part of the team at Anduril—building cutting-edge autonomous systems and defense technology designed to keep our adversaries awake at night. Anduril is a defense products company that flips the traditional model on its head. Instead of waiting for requirements, we identify real problems, privately fund rapid R&D, and deliver operational capabilities in months, not years.

A Southern California native, I combine my military background with the business acumen I earned through the Master of Business for Veterans program at the University of Southern California, Marshall School of Business. I'm also a devoted husband and father of two, and that balance between leadership and family keeps me grounded. Outside of work, you'll usually find me in the water—I'm an avid surfer who's chased waves from Australia to Barbados to Nicaragua.

Experience

Anduril Industries

Mission Operations Lead

December 2023 - Present (2 years 6 months)

Costa Mesa, California, United States

Building cutting-edge technology to keep our enemies awake at night!

Anduril is a defense products company. Unlike most defense companies, we don’t wait for our customers to tell us what they need. We identify problems, privately fund our R&D and sell finished products off the shelf. Ideas are turned into deployed capabilities in months, not years, saving the government and taxpayers money along the way.

The next generation of military technology will depend less on advances in shipbuilding and aircraft design than on advances in software engineering and computing. Our team brings together the smartest Silicon Valley engineers with veterans who have been on the front lines and have first-hand knowledge of the mission. Military veterans are more than 20% of our team and use their defense experience to ensure our products meet the needs of servicemen and women in the battlefield.

USC Marshall School of Business
MBV | Executive Partner
July 2023 - Present (2 years 11 months)
Los Angeles, California, United States

The MBV Executive Partners are over 125 business leaders who have volunteered to serve MBV students. Executive Partners are your dedicated professional network and are available for informational interviews and other forms of support and guidance. With the guidance and support of our Executive Partners, you’ll have the opportunity to learn from some of the most successful and accomplished leaders in the business world.

Compass
Licensed Real Estate Professional
April 2020 - Present (6 years 2 months)
Carlsbad, California, United States

I facilitated the sale and purchase of luxury residential real estate by creating value and providing exceptional customer service. In my role, I spearheaded marketing and value creation strategies for a real estate team, leading to $62.1 million in sales. Additionally, I developed numerous relationships with industry leaders in lending, escrow, and title services to enhance the luxury experience for customers.

HP
Federal Account Manager
April 2023 - December 2023 (9 months)
San Diego, California, United States

Account Manager supporting the Department of Navy in the Pacific Rim, OneNet and CANES programs for NAVWAR Command. Responsible for customer satisfaction and relationships from C-level to warfighter. Duties include briefing DON customers, System Integrators, value added partners on HP Inc portfolio of solutions and personal systems (secure workstations, laptops, desktops, thin clients, both single and multifunction printers)

United States Marine Corps

Company First Sergeant

July 2001 - October 2021 (20 years 4 months)

Greater San Diego Area

-Led and mentored eight Officers, 50 Drill Instructors and 5,500 Marine Recruits while collaborating extensively with outside agencies, advising senior leadership, and implementing evaluative programs for Basic Training.
-Guided and inspired four Officers and 94 Marines and Sailors while deployed to the Middle East, advising senior leadership on the employment of Reconnaissance assets across a highly dynamic and austere environment.
-Cultivated relationships and employed personnel to conduct over 20 high-risk missions vital to national interests
-Managed all operational, logistical and administrative functions of a life support facility containing parachute equipment and assets totaling $5.5M that resulted in the paraloft being recognized by the Naval Safety Center as the safest in the Marine Corps.
-Supervised 5,143 parachute jumps, surpassing all three other battalions collective performance resulting in zero safety mishaps.
-Led Counter Narcotics Team 7113 in support of cross-cultural training to support US strategic interests abroad; resulting in 27 Bajans being trained, further enhancing U.S. relations with the country of Barbados.
-Inspired and led four Officers and 33 Drill Instructors, collaborating extensively with outside agencies, developing subordinates, and employing training evaluation programs for Basic Training that transformed 643 civilians into Marines.
-Named the MARSOC Support Marine of the Year (2010) out of 1,470 other support personnel
-Supervised the conduct of multiple advanced airborne training courses resulting in the training of over 500 Marines and Sailors with zero safety mishaps.
-Conducted over 40 Combat Reconnaissance Patrols as a Vehicle Machine Gunner in support of combat operations in Afghanistan that dramatically shifted the security situation in the area
