Christopher Brooks

Drone Enthusiast | Top Secret SCI Clearance | FAA-certified Remote Pilot under Part 107 | AI Advocate | Veteran Owned Small Business Owner

Vidalia, Georgia, United States

Summary

I am a veteran Capture Manager, business developer, and technical leader with over 20 years of experience in defense, special operations, and federal sectors. I now lead The Investigation Group LLC as Founder, combining my Air Force Special Operations background with expertise in electromagnetic spectrum operations, ISR, digital transformation, and cybersecurity. My career includes securing multi-million-dollar contracts through intelligence-driven capture strategy, operational insight, and innovative solution design for clients across DoD, SOCOM, and federal agencies.

My focus is advancing unmanned systems and field technology, delivering UAS and UGV solutions, spectrum surveys, EMSO and Red Team training, and red team security assessments for drone attack vulnerability. I support government, public safety, and commercial partners by bridging emerging technology and real-world operations. My hands-on experience includes building and testing autonomous UGVs, developing Python-based control systems, integrating RF and computer vision, and designing counter-drone and force protection concepts that translate directly into field-ready capabilities.

I am currently pursuing a Master's in Applied Business Analytics to strengthen my data-driven approach to mission success for every client.

My passion:
Solving complex challenges, empowering teams, and delivering mission-ready, solution-driven innovation for unmanned and security operations

FAA-certified Remote Pilot under Part 107

Experience

The Investigation Group
Founder
July 2025 - Present (2 months)
Pensacola, Florida, United States

Mission Statement

The Investigation Group LLC delivers survey-grade infrastructure intelligence and security solutions by integrating retired Special Operations Forces talent, Blue UAS-compliant technology, and proven government contracting expertise.

Our Commitment

We solve complex challenges, advance critical missions, and empower clients through secure, solution-driven unmanned innovation that combines military precision with civilian excellence.

Combat-Proven Survey Intelligence | Secure UAS Compliance | Mission-Ready Solutions
