Within an year of induction of the cell, we are progressively working towards the implementation of many initiatives like Foreign Training Program (FTP), Semester Exchange Program and several others being in the developemental stage. We are trying to put in our best efforts to make IIT Kharagpur an elite global institution.

Nestlé
EHS Trainee
June 2018 - July 2018 (2 months)
Moga, Punjab, India

◦ Conducted an extensive study on the functioning of the COW Water RO Plant and estimated all the parameters associated with an RO
◦ Estimated the water recovery of 73.4% and found it to be considerably below its value at the time of installation
◦ Investigated into the below-par performance of the RO and suggested pre-treatment of the evaporator-3 condensate

Paras Spices Pvt. Ltd.
Engineering Trainee
December 2017 - December 2017 (1 month)
Moga, Punjab, India

◦ Designed new steam heated ovens for rapid drying as an efficient replacement for the old electrically heated ones
◦ Estimated a steam duty of 60 kg/batch by leveraging the principles of energy conservation and convective heat transfer
◦ Guaranteed a total saving of Rs. 0.89 million per annum and a payback period of 4 months on the proposed project
◦ Decreased the boiler cut offs by increased loading and thus increased its efficiency and decreased the effective steam cost

Education

Indian Institute of Technology, Kharagpur
Bachelor & Masters of Technology, Chemical Engineering · (2016 - 2021)

Sacred Heart School

Class 12 , Non-Medical · (2015 - 2016)
