75th Ranger Regiment, U.S. Army
Senior Intelligence Analyst
May 2015 - January 2021 (5 years 9 months)

Joint Base Lewis-McChord, WA; Washington D.C. Metro Area; Afghanistan

Led a diverse cross-functional team with 25 direct report project managers, operations supervisors, senior analysts, and technicians to create national and regional level strategy; executed ambitious projects in high-risk environments; established and managed international and inter-agency partnerships; design innovative solutions to large-scale ambiguous problems; collect, merge, and analyze qualitative and quantitative big data sets; and conduct immersive market research to identify gaps and prioritize resource allocation in support of national defense initiatives.

• Executed over 400 projects resulting in 600+ objectives met, portfolio management success, and 40+ terabytes of data acquired, organized, and analyzed for future initiatives
• Guided inter-agency, cross-functional project teams that assessed data, created strategic plans and served as technical expert to liaise with 3-6 different high-level stakeholders conduct market research and identify gaps.
• Bridged the communication gap between technical experts and stakeholders, clarified objectives, explained technical specifications and capabilities that expedited the achievement of 600+ project objectives.
• Created collaboration between disparate agencies, built cohesion and gained buy-in that led to successful completion of 400 key inter-agency initiatives – a 10-fold increase from the previous operational protocol.
• Modernized the organizational structure and base methodologies for U.S. counter-terrorism teams using analytics, strategic project nesting and empowered subordinate leadership practices
• Planned and prioritized critical daily and long-term projects applying subject matter expertise and knowledge to drive resource allocation plans, feasibility assessments, and reduce unknowns in pursuit of strategic objectives

7th Special Forces Group (Airborne)
Intelligence Analyst
October 2012 - May 2015 (2 years 8 months)
Eglin Air Force Base, Florida, United States; Afghanistan

Led team of 20 analysts that mined data from up to 15 sources, distinguished relevant details and provided client reports. Additionally, chosen as the program manger of a critical analytical detachment during a vital transition period.

• Analyzed competitors' operations and HR management practices, infrastructure capacity, research and development initiatives and tactics to advise senior leadership on recommended courses of strategic action.
• Presented an average of 5 annual oral presentations for up to 100+ high-level leaders enabled them to use data-driven insights to make strategic operating decisions that impacted up to 1600 personnel globally.
•Selected to run a 20 person detachment of multi-disciplined analysts, created a 20% increase in data production used to complete 150 priority objectives for stake holders ahead of schedule
•Managed the fusion of intelligence across multiple data sources in order to provide relevant targeting information to a twelve member Special Operations team that conducted daily operations in a hostile environment

101st Airborne Divison, U.S. Army
Intelligence Team Leader
June 2010 - October 2012 (2 years 5 months)
Fort Campbell, KY; Afghanistan

Managed 5-person project team that compiled and analyzed multi-source data to produce up to 25+ monthly projects.

• Assessed stakeholder needs, determined project resource, scope and schedule, gathered up to 10-person cross-functional project team to produce an average of 7 weekly production projects.
• Created, validated and facilitated a robust education program that trained classes of 25 students per class to educate 900-person organization on how to provide critical intelligence analysis.

XVIII Airborne Corps
Data Analyst, Strategic Intelligence
December 2008 - June 2010 (1 year 7 months)
Fort Bragg, North Carolina, United States

Entry level multifaceted data analyst responsible for managing the portfolio on three countries in South West Asia which impacted strategic military policy and objectives

• Leveraged access to multi-discipline data sets in order to build graphics for weekly strategic reviews of the current priorities in Afghanistan and the greater South West Asia region
• Provided weekly updates to executive level officers on current intelligence developments to help influence strategic policy
