David Darner

Senior Technical Writer
San Francisco Bay Area

Summary

Technical writer with over 10 years' experience writing proposals and managing documentation for Federal agencies and commercial enterprises. Currently working with A.I. software and infrastructure at Google Cloud Platforms.

Experience

Google

Senior Technical Writer
October 2022 - Present (3 years 9 months)
Sunnyvale, CA

- Automate build orders for 2 billion in data center infrastructure providing financial, compute, networking, ML training, storage, and high-memory services.

- Document PyTorch Library in g3doc markdown sites including guides for runtime, data loading, training (DDP, FSDP), and change management with maintenance teams.

- Design Next-Gen A.I. machines and server halls using country-specific requirements while developing onboarding plans for construction, maintenance, and delivery partners.

- Write product briefings for Customs Agencies using Vertex A.I. Improved publishing time from 2 weeks to 2 days and allowed requesters to create drafts automatically.

- Use Gemini and Apps Script to automate documentation deliverables for Google Cloud Platforms.

- Create assembly and software instructions for financial exchange NPIs (IaaS) to support ultra low latency (ULL) trading.

- Configure and train custom workflows using Agent Studio to automate complex DITA writing requirements. Focused on RAG, SQL Writing, ADK, and Routing Agents.

- Write mechanical engineering catalogs and programmer manuals explaining concepts/code using g3docs.

- Standardize BOMs to solve process inefficiencies between deployment, product, and design teams; automate build orders based on deployment site requirements.

- Publish detailed cabling, machine population, safety, and software requirements for third-party vendors.

- Create and present writer talks and creative solutioning in collaboration with other writing departments.
