Matt Brandom

Global Solutions Engineer & Tech Strategist at Orchid Security (Identity-Fabric Control Plane & Identity-Security Orchestration)
Atlanta, Georgia, United States

Summary

I am deeply motivated by influencing and delivering solutions and successful outcomes to my customers, teams, and the business.

The customers I have worked with and my leadership, management, colleagues & peers have described me as: solutions strategist; thought leader; strategic advisor; outcomes focused; pragmatic; effectual; strategic partner; force multiplier; team builder; cross-functional leader; key influencer; effective listener, learner and communicator.

Core Professional Strength: Cultivating strong relationships with customers, partners and internal stakeholders, and establishing trust as a tech strategist, solutions architect and business solutions strategist with C-suite and executive leadership, cybersecurity teams & IT practitioners.

Industry Experience & Background: In 2014, with VMware's acquisition of AirWatch I joined the End-User Computing BU as a Solutions Engineer. In 2017, I moved into a CS Architect role specializing in enterprise & security architectures, endpoint security, access management, workforce productivity, and digital transformation with VMware's Strategic & Global accounts. In 2020, after 6 years at VMware in Pre- & Post-Sales technical roles I joined Okta as a CS Executive & Tech Strategist for Okta's Strategic accounts (Forbes Global 2000). In mid 2025, I joined Orchid Security as our Global Solutions Engineer, helping organizations solve the identity-security gaps (identity dark matter) with Orchid’s identity-fabric control plane & identity-security orchestration platform.

Specialties & Skills: tech strategist; business solutions strategist; solutions architect; solutions engineer; solution & value selling; executive presence; business acumen; strategic planning; cultivating strong relationships & strategic partnerships; cross-

functional team leadership; building teams & networks; designing/ enhancing processes and operational models; project management; Software as a Service (SaaS); technical & product marketing; sales & technical enablement; zero-trust security architecture (ZTA) & frameworks; enterprise & security architecture; enterprise connectivity models; IT ecosystem interoperability; IT modernization & digital transformation; Identity Security Orchestration; Identity Fabric; Identity Security Posture Management; Identity and Access Management (IAM); Identity Governance and Administration (IGA); Privileged Access Management (PAM); Unified Endpoint Management (UEM); Enterprise Mobility Management (EMM); Mobile Device Management (MDM); Endpoint Security; cloud computing; IT infrastructure & networking

Experience

Orchid Security
Global Solutions Engineer
July 2025 - Present (6 months)
Atlanta Metropolitan Area

Okta, Inc.
Senior Customer Success Tech Strategist, Strategic Accounts
April 2020 - July 2025 (5 years 4 months)
Atlanta Metropolitan Area

• Partnered, coordinated, advised and strategized with my Account and extended Franchise teams to develop opportunities and pursuit strategies, which resulted in total account revenue growth of over 105% in net-new ACV/ ARR (approximately $5.5MM)

• Managed and cultivated a $10.5MM ARR and growing book of business

• Delivered a 98.6% renewal rate with upsells & expansion

• Identified repeatable patterns for success and built solution and value-selling strategies, playbooks, frameworks, engagement motions, best practices, enablement content, customer-facing and internal assets and collateral

• Thought leader, collaborator and influencer for GTM strategy, Pre-Sales Technical strategy, Sales/Account pursuit strategy, Compete strategies,

Technology Partnerships, Tech Marketing, and Product strategy and innovation

• Consulted and advised customers' executive leadership and IT decision makers as a technology strategist and business solutions strategist for Okta's Strategic accounts (Forbes Global 2000s)

• Cultivated strategic customer relationships with C-suite, senior executives and IT practitioners

• Disseminated platform capabilities and map to business objectives, IT outcomes and business value

• Advised and enabled customers on identity strategies and best practices, cybersecurity industry guidance, zero-trust security architecture frameworks, enterprise & security architecture patterns, interoperability, enterprise connectivity models, digital and cloud transformation, and IT modernization

• Influenced and drove interoperability through systems integrations within customers' tech stack and IT ecosystem (enterprise, network and security architecture), delivering extended capabilities (automation, visibility, security controls & compliance) and value

• Organized, built content, coordinated and led architecture and technical workshops with my cross-functional teams - Solutions Architects, Solutions Engineers, Specialists and Product Management

VMware

5 years 8 months

Customer Success Architect (Global & Strategic), End-User Computing

March 2017 - April 2020 (3 years 2 months)

Atlanta Metropolitan Area

• Developed strategic partnerships as a trusted advisor, solutions architect, technology strategist and business solutions strategist with VMware's Strategic and Global customers

• Disseminated technical guidance and execution strategies for IT modernization and digital transformation; developed success plans based on desired business and IT outcomes; overlayed mutual roadmaps; and architected enterprise solutions

• Advised customers on best practices, recommended architectures and solution designs, platform capabilities, and implementations to maximize product investment and value realization

• Drove customer adoption of platform capabilities and emerging/innovative technologies, and accelerated digital workspace transformation measured via on-boarding success, time-to-value realization, achievement of desired business and IT outcomes, product adoption and expansion

• Led and executed strategic and tactical engagements covering key dimensions including best practices, day-2 operations, architecture and technical workshops, and select executive escalations - outcomes measured through Customer Health Score, CSAT, NPS, adoption metrics and measurable KPIs, renewals and product expansion

• Evaluated customers' enterprise and security architectures, business objectives, technical requirements, business strategy, and existing IT ecosystem and workloads to discover technical challenges/needs and define desired business and IT outcomes

• Partnered and collaborated with internal Product and Engineering teams to review customer and field feedback ensuring alignment of platform capabilities and product innovation to customer business solutions, validated architectures and designs, and to address product gaps and barriers to adoption

• Analyzed industry go-to-market strategy and identified successful patterns for architecting solutions and implementing enterprise connectivity models in customers' IT ecosystem and architecture

Solutions Engineer (Enterprise), End-User Computing
February 2015 - March 2017 (2 years 2 months)
Atlanta Metropolitan Area

• Provided Pre-Sales technical expertise specializing in device management, endpoint security, end-user productivity, and identity & access management solutions

• Led Pre-Sales Technical activities including opportunity and use case discovery, platform/product demos, gathering technical requirements and desired business outcomes, competitive positioning, and POCs/POVs

• Educated and enabled Solutions Engineering and Field Sales teams as a subject matter expert for our emerging technology VMware Identity Manager (Workspace ONE Access) - identity broker (IAM) capability in our unified endpoint platform - including product roadmap updates, feature releases, compete strategies, product messaging, and implementation

• Developed strong customer relationships within enterprise accounts as a trusted advisor, and consulted with C-level executives, directors, IT practitioners, and security and network teams to identify needs and design use case-specific solutions based on business objectives and technical requirements

• Bridged organizational boundaries to organize key stakeholders, and lead cross-functional teams for executing projects to address internal and field needs

• Partnered with leadership and cross-functional stakeholders to align Product, Field Sales and Pre/Post-Sales Technical teams; to develop tools and resources; and to improve internal processes/operations, products and customer experience

• Aligned with Product Management and Development teams to resolve product issues, and prioritize product feature requests and platform enhancements as an output of internal testing, field engagements and customer feedback

• Delivered platform demos and technical presentations, and lead technical workshops, labs and break-out sessions for industry analyst, session attendees, and vendor participants at company-sponsored trade shows and tech conferences

Application Support Engineer

September 2014 - February 2015 (6 months)

Atlanta Metropolitan Area

• Supported mobile application, content and email management, and post-sales software implementation for the AirWatch Enterprise Mobility Management product line

• Performed server-side and endpoint device software installation, configuration, testing, and troubleshooting

• Engaged with customers to provide technical training and documentation, and communicated best practices, recommended configurations, and implementation strategy

• Provided feedback from the field to the software development team for product improvements and feature requests

• Managed product escalations, and prioritized post-deployment projects to provide troubleshooting and resolutions to reported field issues in customers' production environments

• Supported software quality assurance/engineering activities, including testing and documentation of product issues

• Developed support resources and assets to improve customer communication and experience, as well as internal processes

• Communicated new product features and major releases to customers for deployment

St. Jude Medical

Electrophysiology Technical Field Specialist (Atrial Fibrillation & Cardiac Rhythm Management)

May 2011 - December 2013 (2 years 8 months)

Atlanta Metropolitan Area

Certified Electrophysiology Technical Service Specialist (or Field Clinical Engineer) in Atrial Fibrillation & Cardiac Rhythm Management for St. Jude Medical, US Division.

• Clinical and technical expert, medical device professional, and field liaison between the sales teams, regional hospitals, the physicians and clinical staff

• Provided field support of Cardiac Rhythm Management (CRM) and Electrophysiology (EP) product lines, performing cardiac device implants, clinic device interrogations, and 3D mapping for cardiac ablation procedures

• Consulted with physicians and lab staff to program and troubleshoot implantable cardiac devices, operate EP equipment during procedures, and strategically position product and solutions

• Expanded the use of remote monitoring products and cardiac devices at key accounts by presenting economic models, demonstrating cost-benefit analysis; providing studies outlining clinical benefits to patients, and proving increased clinical efficiency

• Aligned with the sales team to implement technical marketing and sales strategies for product expansion at key accounts

• Utilized consultative and solution selling strategies to identify and nurture sales opportunities

• Assisted in the interview and recruitment process for the Electrophysiology Technical Service Specialist Field Intern Program with St. Jude Medical.

• Provided clinical and technical field training for the Arrhythmia Technologies Institute students, while the students shadowed device implant cases, clinical device interrogations, and 3D cardiac mapping and ablation procedures.

Georgia Institute of Technology & Emory University
Student Research Associate, Clinical Observational Design Experience
August 2010 - December 2010 (5 months)
Atlanta, Georgia

Joint program through the Georgia Institute of Technology's Department of Biomedical Engineering & Emory University's Department of Emergency Medicine

• Identified and analyzed system bottlenecks as an ethnographer immersed in the clinical setting of both Grady Memorial Hospital Emergency Care Center and the Emory University Hospital Emergency Department (ED); developed models and solutions using design processes for ED systems and operations

• Assisted in clinical research and quality improvement efforts of the clinicians from Emory’s Department of Emergency Medicine by working with patients and healthcare professionals to insure that collected data was in line with the strategic objectives of our ongoing studies to improve patient care

Georgia Institute of Technology, Biomedical Engineering Department

BME Capstone Senior Design Project

August 2009 - May 2010 (10 months)

Atlanta, Georgia

• Obtained clinical/research hands-on experience with commercial development processes, project management, concept and prototype development, design verification testing, FDA Quality Systems Regulations, design controls and 510(k) FDA compliant regulatory pathway submission for commercialization of medical devices

• Worked as a cross-functional team through the engineering design process to develop a patentable prototype medical device for Bard Medical

Georgia Institute of Technology, Mechanical Engineering Department

Teacher Assistant

January 2007 - May 2007 (5 months)

Atlanta, Georgia

Teacher assistant for COE 2001 (Statics) spring of 2007.

• Provided tutoring and review sessions for students and communicated material and concerns to professor

• Aided students in the development of systems analysis and problem-solving strategies

---

Education

Georgia Institute of Technology

Bachelor of Science (B.S.), Biomedical Engineering · (2005 - 2010)
