Paul Miller

Software Engineer
United States

Summary

Experience

Anduril Industries
Software Enginer
June 2026 - Present (1 month)
Costa Mesa, CA

Epic Games
Tools Programmer - UI Systems
February 2025 - June 2026 (1 year 5 months)

Ubisoft
Tools Engineer
December 2022 - February 2025 (2 years 3 months)

On the Core Tech team working on editor and gameplay tools within Snowdrop Engine.

Work with artists and designers to support feature work, automation, and maintenance for debug, animation, cinematics, and lighting systems.

Shipped XDefiant

Obsidian Entertainment
Tools Programmer
November 2020 - December 2022 (2 years 2 months)

Developed and maintained Unreal 4 plugins to support procedural level design, environment art, and content automation.

Worked on The Outer Worlds 2

Infinity Ward
Associate Tools Engineer
May 2020 - November 2020 (7 months)
Woodland Hills

Applied Minds
3D Graphics Software Engineer
November 2018 - May 2020 (1 year 7 months)

Glidewell Dental
3D Software Engineer Intern
June 2018 - November 2018 (6 months)

Actively contributed to a 3D rendering framework and CAD software package that used in the design and manufacturing of dental products such as crowns, bridges, implants, dentures, etc.

Added a multipoint mesh deformer tool, which provided real-time configuration of deformation curve. Curve was computed using a Gaussian function based on radial distance of points from selection point.

Implemented a class-generating macro that reported statistics about functions and methods that required instrumentation.

Created a 3D Transformation Widget, which rotated, scaled, and translated models in world or local space. Scaling was non-uniform, and all rotations were about the center of the objects' bounding box

Created a Scikit application to classify tooth color data to its corresponding Vita shade. Used of Scikit-learn alongside numpy to acheive this.

California State University, Fullerton
1 year 9 months

Supplemental Instructor
January 2017 - May 2018 (1 year 5 months)
Orange County, California Area

Lead weekly group study sessions for Data Structures students, covering lists, trees, graphs, and hash tables in C++
Created implementation examples and potential exam questions to encourage students to critically solve problems on their own

Instructional Student Assistant (Grader)
September 2016 - December 2016 (4 months)

Graded homework assignment for students enrolled in the Data Structures Course at CSUF.
The course covered various implementation and design of data structures and algorithms specifically in C++. Such Data Structures topics covered include lists, stacks, queues, linked structures, binary search trees, AVL trees, red-black trees and graphs. Various algorithms topics included hashing, sorting and searching.

Senseye, Inc.
Software Consultant
December 2017 - February 2018 (3 months)
Austin, Texas Area

Developed a Qt application that recorded and charted Prepar3D flight simulation session data for flight students
Interfaced a Pupil-Labs UDP connection to plot real-time line graphs for pupil radius and eye position
Created CSV table importer and exporter for the user and flight session records
Generated multiple real-time line plots to visualize altitude, and speed data from an active simulation instance
Added debriefing functionality to allow students to select and review the data charts for a given session

Saddleback College
Computer Science Lab Aide
January 2015 - June 2015 (6 months)
28000 Marguerite Pkwy, Mission Viejo, CA 92692

Tutor and assist students currently enrolled in introductory C++ courses at Saddleback College.

Education

California State University-Fullerton
Bachelor of Science - BS, Computer Science · (2015 - 2018)

Saddleback College
N/A, Computer Science · (2012 - 2015)
