Scott Shilvock

Unmanned Systems and Defense Intelligence Professional with 21+ years of Training and Program Management Experience | R&D | Mishap Investigation | TS/SCI | Special Operations Veteran
Navarre, Florida, United States

Summary

At Edge Autonomy, our commitment to advancing unmanned aircraft systems is fueled by a rigorous approach to training, where my role as Training Manager revolves around strategic planning with tactical implementation tailored to our individual customer's needs. Our team's success is a testament to this meticulous execution, ensuring the highest standards of operational readiness.

My background as a Senior Mission Intelligence Coordinator has been instrumental in integrating military precision into civilian UAS operations. With a proficiency in product development and project management, I've contributed to synchronizing multi-team efforts that enhance mission success and push the boundaries of UAS capabilities.

Experience

Edge Autonomy
Training Manager
December 2023 - Present (1 year 8 months)
Huntsville, Alabama, United States

U.S. Air Force Reserve
Senior AFSOC Mission Intelligence Coordinator/Instructor
February 2020 - January 2024 (4 years)
Hurlburt Field, Florida, United States

- Dynamically managed simultaneous missions in multiple geographic locations ensuring mistake free prosecution and reporting of successful targets and dynamic retasking for follow on targeting, resulting in 100% success rate.
- Fused intelligence and from numerous databases and product sources to track and corelate High Value Individuals for prosecution resulting in 12 kinetic strikes, 13 raids and over 82 enemy either captured or killed.

▪ Key liaison between SOF operators on the ground, armed aircrew and imagery exploitation teams, ensuring integrity of intelligence correlation, airspace deconfliction and strike recommendations.
▪ Trained and onboarded 30 special operations intelligence personel, ensuring 100% manning through timely and seamless integration into the flight schedule.
▪ Pioneered new database to proactively identify flight crew who were at risk of losing currency and alert them to tasks needing to be performed, resulting in zero members dropping off of the work schedule for currency issues.

Air National Guard
Intelligence Analyst
September 2007 - February 2020 (12 years 6 months)

▪ Managed both internal and external training programs to track, train and maintain the currency requirements of 10 intelligence professionals and 20-30 fighter pilots, achieving 100% compliance for mission readiness.
▪ Developed, implemented and currently maintain a 65-lesson Master Training Plan syllabus which standardizes and fulfills annual pilot training.
▪ Expert in all aspects of fighter squadron intelligence support from mission planning to post mission reporting including “best seen to date” debriefing and MISREPS at various Red Flag exercises.
▪ Subject matter expert in air superiority weapons and threat systems counter tactics and analysis, including radar theory, IR theory and advanced, classified weapons systems and sensor usage.

Insitu Inc
9 years 4 months

Program Manager
June 2018 - August 2019 (1 year 3 months)
Hood River, OR

▪ Developed and managed a $10M yearly defense program achieving high levels of customer satisfaction, resulting in contract renewal for the two years under my care.
▪ Coordinated contracting, finance, pricing and all aspects of proposal development to ensure an on time and within scope yearly contract for our end user.
▪ Management and execution of schedule and budget against integrated master schedules while mitigating identified risks and creating plans of action to tackle unknown risks as they arise, understand realized risks and opportunities resulting in an end of year budget 7% below targeted goals.

▪ Pioneered and executed innovative proposal for fixed firm price structure for customer repairs to shorten product repair times by 50% and provide predictable pricing for the customer and profits for our depot level maintenance department.
▪ Hosted quarterly customer program reviews, coordinating subject matter expert presentations and fostering relationship building with the customer and key stakeholders within the company.
▪ Coordinated with Advanced Development department to propose special projects with rapid development timelines to our end user, directing the development team and delivering releases on time and under budget.
▪ Proposed and executed to completion a “first of its type” cross developmental project between customer and supplier to enable cost sharing that reduced development budget by 30%.

Mishap Investigator
May 2016 - June 2018 (2 years 2 months)
White Salmon, WA

▪ Conducted defect root causes analysis through telemetry data forensics, human factors analysis and material defect investigations resulting in root causal findings with 20% greater efficiency than historical investigations.
▪ Drove process improvement using lean six sigma methodology to solve inefficiencies with UAS operator redeployment, reducing debrief time by 80% while driving a 23% increase in hazard reporting.
▪ Researched and reported historical and current trends of safety incidents and mishaps to senior leadership along with analysis to provide actionable intelligence that was used to allocate funds towards programs that would end up reducing mishaps by up to 25% in several categories.
▪ Fostered and cultivated a culture of safety through presentations and briefs to senior leadership, company pilot cadre and pilot course students that increased awareness of our Safety Management System, resulting in an increase in participation by 15%.

UAS Pilot Course Manager
February 2015 - May 2016 (1 year 4 months)
White Salmon, Washington, United States

▪ Led Insitu ScanEagle Pilot classes, simultaneously managing the schedules of over 25 instructors, 50 Pilot course students, and dozens of department resources to ensure the needs of all training events were met and delivered on time.

▪ Delivered sensitive communications to customers. Responsible for student dismissals and writing MFRs to internal and external clients, documenting the decision process for course separation.
▪ Routinely modified and managed instructor and student schedules to meet ad hoc requirements and tasks at all hours of the day and night.

UAS Pilot Instructor and Designated Examiner
February 2011 - February 2015 (4 years 1 month)
White Salmon, Washington, United States

▪ Named 2014 Instructor of the Year due to superior customer support and delivery of services.
▪ Helped establish Naval Special Warfare's internal schoolhouse, collaborating with Navy customer to design and implement a customized course that met training and time requirements for an accelerated schedule.

UAS Piliot and Site Lead
May 2010 - February 2011 (10 months)

▪ Served as Site Lead for numerous austere deployments to the Middle East and Arctic Circle of Canada.
▪ Led logistics, troubleshooting of equipment malfunctions with limited resources and management of customer expectations in the face of difficult situations and conditions.
▪ Played key role as Situation Report (SITREP) Administrator for Insitu's largest operational site, responsible for timely, daily collecting and reporting of mission effectiveness, inventory and maintenance schedules.

Northrop Grumman Corporation
Financial/Intelligence Analyst
October 2007 - November 2008 (1 year 2 months)

▪ Served as the lead financial analyst at FBI Headquarters, New Orleans in the Bureau's Hurricane Fraud Task Force. Responsible for a group of 3 analysts across the gulf region, resourcing their expertise to appropriate investigations to ensure 100% support to over 25 Bureau prioritized investigations.
▪ Forged relationships across multiple diverse industries, departments and customers, from the Department of Housing and Urban Development to local banks and financial institutions that were necessary for successful fraud investigations.
▪ Awarded both the "Timely Award" and "Outstanding Performance" awards for superior performance in delivering oversight of financial fraud investigations that resulted in 5 successful prosecutions based on my team's analysis.

▪ Utilized data from multiple classified and open source databases to fuse into comprehensive intelligence products that were used by FBI agents and leadership to as the basis to prosecute 11 different federal cases.

United States Air Force

Intelligence Analyst

September 2003 - September 2007 (4 years 1 month)

▪ Lead investigative analyst for hostage communications analysis, fusing intelligence to identify latest trends and findings to the General level and ultimately contributing to the rescue of 3 US citizens held for over 5 years.

▪ Polished and confident speaker hand selected and trusted by 12th AF Flag Officers to instruct the upper echelons of military leadership with the latest intelligence estimates.

▪ Lead Colombian Analyst responsible for managing the reporting of over 8 analysts and coordinating their analysis into daily briefs and reports for senior leadership.

▪ As Antiterrorism Officer, created comprehensive new threat profile report for new mobility mission at overseas USAF base, changing security forces posturing and airfield flight patterns resulting in no threats to personnel or equipment to date.

▪ AFSOUTH ISR Matrix board member, responsible for coordinating ISR coverage for South America and ensuring appropriate sensor usage in different conditions across the AOR for mission success.

▪ Authored daily read file for senior Flag Officers, responsible for filtering intelligence channels, fusing reporting and writing customized analysis to enhance their decision making.

▪ Monitored M3 message traffic and identified intelligence gaps and submitted requests for information (FRI) and collection requirements (CRs) through appropriate channels to allow for the dynamic re-tasking of intelligence, surveillance, and reconnaissance assets to cover critical gaps.

Education

University of Washington

Bachelor of Arts (B.A.) in Business Administration, Business Administration and Finance · (1996 - 2000)
