USAF
Deputy Chief, Program Manager
2009 - 2014 (5 years)

Thought leader and champion of USAF Ground Moving Target Indicator (GMTI) Processing, Exploitation, and Dissemination (PED) Enterprise Architecture.

Spearheaded cross-functional multi-program working group to synchronize efforts towards a common goal. Instrumental in formulating the mission and business strategy for GMTI PED Branch initiatives focused on transitioning GMTI capabilities from the lab environment to the battlefield.

Lead spokesman for garnering outside advocacy with AFISRA, NASIC, NGA, 116th ACW, and other GMTI community members.

Handpicked to build and lead a cross-functional 18-member team tasked with planning and implementing an incremental strategy to develop, test, and field battle management ground node enabling a $1.2B hi-vis radar system.

Aligned multiple disparate organizations. Focused integrated product team on threshold and objective goals. The team successfully scoped effort to meet requirements on cost and schedule. Successfully chartered DoD Acquisition Strategy Approval Process and led project team through successful contract award.

Leadership Tiger Team choice to investigate Quick Reaction Capability (QRC) to employ new MP-RTIP radar technology as a pod considering feasibility, fabrication accessibility, spare parts, training, and depot standup to support maintenance and long-term sustainment.

Guided multi-member cross-functional, cross-coalition team through a successful live fly interoperability demonstration over the National Training Center at Fort Irwin. Championed requirements determination process for the initial phase. Devised and staffed a rapid acquisition strategy across three Air Force Systems Centers for Program Executive Officer approval.

*Architect of GMTI technology transfer process enabling rapid prototyping, demonstration, trials, training, and delivery of force-multiplying multi-INT fusion capabilities to the battlefield.

CSpot, LLC
Co-Founder, Chief Strategy Officer
2006 - 2009 (3 years)
