Engineering

Jeremiah Masséus

Test Engineer at Chaos

Los Angeles, California, United States

Experience

CHAOS Industries

Production Test Engineer

March 2025 - Present (1 year 5 months)

Los Angeles, California, United States

Boeing

Test Systems Design Engineer

July 2022 - March 2025 (2 years 9 months)

El Segundo, California, United States

Design, develop, and maintain specialized test systems used to test electronic components for space and defense applications at the board, slice and unit level

o Identify compatible hardware & design systems to meet test requirements EM and flight hardware

o Troubleshoot, debug, verify, and validate LabVIEW-based & C#-based test executives

o Support, Troubleshoot and Maintain Special Test Equipment Stations using test executives in LabVIEW and C#

o Serve as the Responsible Engineering Authority (REA) for multiple test stations

Honeywell

Test Engineer I

January 2021 - July 2022 (1 year 7 months)

Design, and build test hardware and software used to evaluate part and system performance and survivability in Single Event Effects (SEE), Prompt Dose, Displacement Damage, and Total Ionizing Dose (TID) test environments for space and defense applications.

o Serve as Test Lead for multiple programs, and provide support to other test engineers programs as needed

o Design Programmable Circuit Boards (PCBs) using software such as KiCAD & design test software evaluate to piece part performance

using Microcontrollers with C++, and FPGAs with Verilog.

o Evaluate and Troubleshoot test fixtures using laboratory and test equipment such as multimeters, function generators and oscilloscopes
o Work closely with system engineering to write test plans and collect data that meets program, Military Standard, & system requirements

University of South Florida
Sound and Light Technician
November 2017 - December 2020 (3 years 2 months)
Tampa, Florida, United States

Audiovisual technician in charge of planning and operating sound, light and video equipment and systems at the Marshall Student Center for events. My tasks consist of identifying, analyzing, and resolving any technical issues with sound, light, and AV equipment and systems, and communicating with clients prior to, and through the duration of, an event to address all AV concerns or issues.

The Mosaic Company
Electrical Engineering Intern
June 2020 - August 2020 (3 months)
Bartow, Florida, United States

Assisted senior engineers in managing the operation, maintenance, repair, & optimization of turbine generators on Mosaic plants.

Ameren
Electrical Engineer Co-op
May 2018 - December 2018 (8 months)
Peoria, Illinois Area

Assisted engineers with projects within Division I of Ameren Illinois's electrical power distribution system in the area of project management, studies, engineering and maintenance. My tasks and responsibilities consisted of:
• South Acre Road Redistribution Project
o Determined which transformers required upgrading to support load requirements of a growing neighborhood
o Reconfigured the placement of underground cable and transformers to increase efficiency & improve accessibility for maintenance crews.
• On-going Maintenance and Operation projects
o Investigation of reports of Multiple Device Interruptions (MDI).
o Maintenance and improvement of overhead and underground systems.
o Overhead Distribution Relocation for Illinois Department of Transportation.

Education

University of Central Florida

Master's degree, Computer Engineering · (January 2021 - December 2024)

University of South Florida

Bachelor's degree, Electrical and Electronics Engineering · (2017 - 2020)

Cornell University

· (2015 - 2017)

International Baccalaureate at Bartow High School

High School Diploma · (2011 - 2015)
