Arthur Kim

SWE@Anduril; React, TS, Haskell, Nix, and more!
Costa Mesa, California, United States

Summary

I'm currently working as a full-stack dev at Anduril Industries. My main tech stack includes React, TypeScript, and Haskell (I'll update this as I get a better idea of my job duties). I also have a portfolio which demonstrates my ability in embedded programming, AVR assembly, Rust, .NET Core, and Python.

Feel free to connect with me on LinkedIn; I'm always looking to expand my network!

Experience

Anduril Industries
Software Engineer
August 2025 - Present (11 months)
California, United States

Focus on shipping frontend features using React/TS, but my contributions also include Nix and Haskell code and domain knowledge on internal tooling.

Self-employed
Self Employed
March 2024 - August 2025 (1 year 6 months)

University of California, Los Angeles
Undergraduate
September 2017 - March 2024 (6 years 7 months)
