EXECUTIVE PRESENCE AND INFLUENCE: PERSUASIVE LEADERSHIP DEVELOPMENT

Sarha Mavrakis

VP, AI Data | Turning human intelligence into scalable AI systems
Washington DC-Baltimore Area

Summary

I build the commercial and operational foundations that allow advanced AI systems to scale.

My background spans enterprise technology, global data operations, and complex go-to-market leadership, with a consistent focus on turning emerging AI capabilities into reliable, production-ready solutions. I work closely with technical, research, and executive teams to define offerings, design operating models, and align organizations around measurable outcomes.

My current focus is on AI evaluation and readiness at global scale—ensuring models can be tested, calibrated, and trusted across languages, domains, and deployment contexts. As AI becomes infrastructure, the differentiator is no longer just model quality, but the systems that govern how models are assessed and improved over time.

Experience

TBA
VP AI Data
November 2025 - Present (3 months)
United States

:) Research Product for AI model builders

Not an LSP

The intersection of AI systems, evaluation infrastructure, and human-judgements

Our focus is building repeatable, decision-grade platforms for model evaluation, multilingual quality, and expert-led data workflows. The goal is to

move beyond one-off labeling toward systems that scale, improve over time, and integrate directly into model development lifecycles.

I have spent the last decade partnering with enterprises, AI labs and hyperscalers on how data, tooling, and human expertise actually operate together in production. Implementing language models for business is cases before people knew what language models were.

Welo Data

VP, Head of Global Commercial

January 2024 - October 2025 (1 year 10 months)

United States

Led global GTM for Welo Data, the AI training-data and digital enablement division powering multimodal model training, safety evaluation, and data-driven product quality for Big Tech, AI labs, and sovereign technology organizations.

• Delivered 70% YoY revenue growth to through strategic account expansion, pricing transformation, and diversification across AI, media, e-commerce, and sovereign digital programs.

• Built and scaled the global Commercial organization — Sales, Account Management, Solutions, Deal Desk/Bid Desk, US BD, and International BD — recruiting, developing, and leading senior commercial, technical, and GTM leaders across regions.

• Owned executive relationships across Mag 7 + Labs, aligning AI data, evaluation, and training programs with digital advertising quality, search performance, model alignment, and customer experience outcomes.

• Negotiated multimillion-dollar renewals and rate uplifts, improving gross margin by while strengthening long-term partnership models with global customers.

• Designed and launched the centralized Solutions Organization, reducing bid turnaround from weeks to days, driving 10+ point improvements in win rate, and unifying technical solutioning, pricing, and GTM motions.

• Expanded Welo Data’s international footprint across EMEA, APAC, and MENA, opening new enterprise and sovereign AI opportunities and building regional revenue engines for 2025–2026 growth.

• Established global commercial governance — pricing standards, S&OP cadence, forecast discipline, and delivery alignment — increasing predictability, margin control, and cross-functional clarity.

• Partnered with Engineering, Product, and ML Ops to shape new AI data offerings including synthetic/hybrid data workflows, evaluation pipelines, and multilingual fairness frameworks.

TELUS Digital

Director, Global Accounts (AI)

August 2021 - January 2024 (2 years 6 months)

Global

Led a multi-hundred Millions global AI and digital operations portfolio supporting AI training, model evaluation, search ranking, ad quality, safety, and multimodal data programs for global technology clients.

• Directed 20+ large-scale AI programs spanning search relevance, ads quality, content operations, rater governance, safety and policy evaluation, LLM tuning, speech/ASR workflows, and multilingual data programs.

• Delivered 30%+ YoY revenue growth and expanded wallet share by 20%, establishing long-term strategic partnerships through executive steering committees, joint investment programs, and operational transformation initiatives.

• Built Account Management team, including pre-sales and solutions and customer success with a 70% global bid-win rate, coordinating product, engineering, delivery, QA, and sourcing to design scalable AI data and evaluation solutions.

• Built executive governance structures that improved transparency, SLA compliance, latency, accuracy, and model improvement cycles — enabling 100% program retention over tenure.

• Partnered with product, digital operations, and engineering teams to co-design model-evaluation frameworks, multilingual data pipelines, and quality standards used across multiple product areas.

• Served as the commercial and operational bridge between high-volume rater/evaluator ecosystems and client engineering teams, ensuring alignment between data quality, model performance, and product priorities.

• Influenced GTM strategy by helping product and sales teams define differentiated AI data and digital enablement solutions for enterprise and cloud customers.

Qualtrics

Engagement Manager

May 2019 - August 2021 (2 years 4 months)

Reston, Virginia

• Led enterprise clients through a 360° analytical transformation of their customer lifecycle — driving customer value, retention, and long-term program expansion by operationalizing insights across marketing, support, digital, and CX organizations.

• Directed the technical development, integration, and configuration of client data pipelines, including ingestion of multimodal datasets, data transformations, schema design, and migration workflows across on-prem and SaaS systems.

• Built and owned executive relationships across client organizations, shifting engagements from tactical reporting to programmatic analytics — resulting in multimillion-dollar cost reductions within two years.

• Delivered 30% ARR expansion through strategic value identification, business case development, and renewal negotiations; maintained ownership of scope, schedule, and budget adherence across all programs.

• Led cross-functional teams (Product, Engineering, Data Science, Operations) to build industry-vertical packaged solutions, enterprise playbooks, and analytics-driven process improvements.

• Managed consulting engagements that produced executive-level business analyses, trend identification models, and real-time insight frameworks for acute customer experience events.

• Designed and led Beta programs for new product features and platform enhancements, serving as a client advocate informing product roadmap, UX improvements, and analytic capabilities.

gategroup

3 years

Manager, IT Applications

2018 - May 2019 (1 year)

Reston, Virginia

• Led the global transformation of gategroup's enterprise applications ecosystem, overseeing the implementation of Microsoft Dynamics 365, advanced forecasting engines, and integrated supply chain platforms across 15+ countries.

• Directed end-to-end technical delivery across 230+ customizations, 42 API/data integrations, multi-system migrations, and cross-region infrastructure changes, ensuring performance, compliance, and business continuity.

• Owned enterprise requirements engineering, release planning, UAT/QA governance, and the overall deployment strategy — unifying engineering, operations, and finance within a single programmatic framework.

• Managed global development teams, BI analysts, integration engineers, and external SI/consulting partners, setting delivery expectations, sprint cadences, SLAs, and architectural decision paths.

• Designed and deployed automated workflows, data pipelines, and cross-module process integrations that supported 400+ global users and improved operational accuracy and cycle-time efficiency.

• Served as the primary liaison between regional leadership, IT Applications Development, and functional SMEs — translating operational needs into scalable application features, roadmaps, and system enhancements.

Sr Business Analyst, IT

2016 - 2018 (2 years)

Reston, VA

• Acted as Product Owner for customer-facing portals, ERP-integrated modules, and global supply chain systems, directing feature definition, roadmap planning, and cross-platform workflow design.

• Led functional requirements engineering and process re-design efforts across procurement, forecasting, inventory management, and logistics — building scalable business logic for enterprise-wide technology adoption.

• Directed key technical integrations including APIs, ETL pipelines, authentication/SSO configuration, middleware workflows, and SaaS feature expansions to support operational and financial transformation.

• Partnered with engineering, operations, finance, and regional business leaders to align system capabilities with commercial strategy, compliance needs, cost controls, and global operational standards.

• Drove backlog prioritization, sprint planning, testing cycles, and release deployment across internal development teams and external SI partners.

• Improved data integrity, reporting fidelity, and system usability by developing specifications, testing protocols, and validation frameworks used across global teams.

Pourshins

7 years

Senior Manager, Supply Chain Planning, International

2013 - 2016 (3 years)

Reston, Virginia

-Responsible for managing purchasing team of buyers, inventory analysts of 500+ SKUs with $140+ million in annual spend.
-Manage, control, governance, and accountability over network optimization and rebalancing activities to between regional distribution centers of 500+ skus over Asia, Europe, and US distribution centers
-Manage external Logistics partners to optimize the supply chain functions includes responsibility for warehouse operations and inventory control
-Oversee product lifecycle transitions, new product introductions, hard date launches, third party warehouse management operations, inventory analysis, and compliance.
-Build new product implementation forecasts with expertise in demand and forecast analysis, cost and inventory modeling, and working capital planning.
-Generate in-depth explosion forecasts against flight schedules and bills of materials (BOM) for hard product launches; resolve process failures by

creating standard operating procedures (SOPs) and documentation using Microsoft Visio.
-Identify gaps and savings opportunities within supply chain by analyzing logistics network cost of goods sold (COGS); define request for proposal (RFP) strategy analysis and develop supply chain approach to serve airline clients and reduce costs.

Manager, Supply Chain Control
2011 - 2013 (2 years)
Reston, Virginia

• Analyzed logistics network COGS to identify savings opportunities, enhancing supply chain efficiency for airline clients.
• Managed optimization and rebalancing of 1000+ SKUs across Asia, Europe, and US distribution centers.
• Developed excess inventory management methodology, achieving $445k in annual storage cost recovery.

Asset Purchasing Manager
2009 - 2011 (2 years)
Reston, Virginia

Plan, purchase, and manage distribution of $24m in nonperishable goods annually at a 99.5% Order Fill rate while exceeding customer expectations in inventory turns across global supply network. Minimize excess on-hand inventory utilizing MRP and working capital costs by improving inventory turnover and reducing network days on hand by 10%
Transition NWA In-Flight equipment into Delta supply chain post-merger; built processes for combining airline supply chain and new product implementation. Onboard 50+ suppliers and 150+ skus meeting order fill rate
Develop exemplary supplier relationships and compliance through scorecard feedback to prevent service failures; drive supply chain efficiencies and created synergies to drive lead time reductions, on time and in full compliance, supplier held safety stock utilizing customer forecast.
Stage, plan, and implement 150+ skus to open Asian Distribution Center and transition all inventory to new domestic warehousing and transportation providers, ensuring thorough process implementation as well as availability of product and deliveries to end users throughout the Americas
Provide logistical alternative direction to operations team in low stock situations to minimize transportation costs and deliver to end users on time and in full

Urban Outfitters

Free People Planning Assistant
2008 - 2009 (1 year)

Analyzed national retail sales to plan for markdowns and inventory sell off on a daily basis; prepared weekly sales and forecast analysis for department use

Utilized existing company initiatives in styling to develop product plans and drive sales to reduce inventory

Created, reviewed, and presented divisional and class business strategy analysis and plans for $100 million annual budget

Analyzed current and forecasted future sales to identify growth opportunities

Utilized database information and Microsoft Office daily to project trends and effectively manage inventory

Smith Barney
Client Services Associate
July 2006 - June 2007 (1 year)

Assisted Senior Vice President of Wealth Management with Client Services

Created reports for clients and financial advisors using StyleAdvisor, AllocationAdvisor, and Morningstar Principia
