Seattle, Washington, United States

Experience

Stealth AI Startup
Principal Product Designer
March 2024 - October 2024 (8 months)

Intuit
Product Design Strategist
October 2022 - March 2024 (1 year 6 months)
Seattle, Washington, United States

Led design strategy for high-growth initiatives, balancing MVP delivery with long-term vision to open new revenue streams. Translated market opportunities into scenario-based design frameworks and cross-product journeys that accelerated time-to-market and deepened customer retention. Embedded emerging technologies, including generative and agentic AI, to create differentiated financial experiences and automate complex workflows.

• Introduced a scenario-based design approach that streamlined the transition from MVP to PMF.
• Increased ecosystem retention by unifying customer journeys across multiple Intuit products.
• Defined GenAI experiences delivering personalized financial insights to drive strategic bets
• Expanded automation with agentic AI models that orchestrate multi-step financial workflows.

Compass
Senior Manager, Product Design
December 2021 - September 2022 (10 months)
Seattle, Washington, United States

Directed design for consumer and agent real estate tools, unifying fragmented experiences into a connected customer journey. Defined and articulated the “Everything Home” north star, aligning teams on a vision that spanned the full lifecycle of buying, selling, and homeownership. Led with a mobile-first approach to deliver high-impact, on-the-go experiences for agents and clients. Introduced AI-assisted tools to improve efficiency, insights, and client service.

Mentored a high-performance design team while ensuring strong business alignment.

• Connected the customer journey across consumers, clients, and homeowners end-to-end.
• Redesigned mobile workflows to prioritize agent productivity and real-time client engagement.
• Integrated AI-driven insights into search, pricing, and communications to improve decision-making.
• Increased feature adoption and overall platform usability through research-led design improvements.

Wyze Labs
Head of Product Design
September 2019 - November 2021 (2 years 3 months)
Seattle, Washington, United States

Hands-on design leader, elevating the team and organization by maturing the design practice through process, best practices, and quality of craft. Operated in parallel tracks delivering near-term product execution while advancing long-term vision. Guided Wyze's shift from device-focused to AI-led smart home experiences, anchored on three priorities: building emotion and trust, making design a defensible moat, and driving monetizable behavior. Balanced innovation with measurable customer delight.

• Unified Wyze's ecosystem through a cohesive design vision spanning hardware, software, and brand.
• Embedded process, measurement, and best practices to raise design maturity.
• Accelerated time-to-market through a company-wide design transformation.
• Defined team culture to foster ownership, collaboration, and high-craft execution.
• Mentored direct reports, building a design organization that drove innovation and business growth.

Axon
Principal Product Designer
March 2017 - September 2019 (2 years 7 months)
Seattle, Washington, United States

Led Axon's transformation into a modern public safety platform, spanning next-gen HW/SW for law enforcement. Applied behavioral insights to design

smart, connected hardware and in-field mobile workflows, unlocking new use cases from RTCC integration and live-streaming to AI/ML-driven capabilities at scale. Delivered an end-to-end ecosystem uniting body-worn cameras, Tasers, dispatch, and mobile apps. Designed for trust, safety, and intentionality in public safety critical workflows.

• Owned design from discovery through officer immersion, prototyping, testing, and deployment.
• Designed next-gen Taser and BWC interactions for seamless high-stakes workflows.
• Created the Command View mobile app for real-time situational awareness in the field.
• Defined vision concepts that secured contracts and reinforced Axon's market leadership.
• Balanced delivery and strategy to shape multi-modal interaction design for future policing.

Facebook
Senior Lead Designer
November 2016 - March 2017 (5 months)
Seattle, Washington, United States

Partnered with cross-functional teams to define and deliver new Messenger features on iOS and Android. Translated ambiguous concepts into clear, valuable user flows that improved engagement. Contributed to high-level product strategy while ensuring execution quality.

• Designed mobile features that increased daily active use in targeted regions.
• Created flows that reduced friction in message discovery and sharing.
• Influenced product roadmap with data-backed UX recommendations.

Cyanogen
Principal Product Designer
November 2014 - November 2016 (2 years 1 month)
Seattle, Washington, United States

Led the creation of Cyanogen OS Design Language, shaping visual and interaction patterns across the platform with personalization and deep customization as the core design lens. Designed experiences that empowered users to tailor devices to their identity while driving market differentiation, aligned with Cyanogen's mission to take Android away from Google.

Spearheaded the design for Cyanogen's first flagship AT&T device, covering both hardware and software.

• Created embedded services that enabled new business models and third-party OS integrations.
• Defined HW/SW signature interactions that differentiated in a saturated Android market.
• Established scalable UI systems adopted across multiple OEM and carrier partners.

Microsoft
Senior Design Lead
May 2013 - November 2014 (1 year 7 months)
Seattle, Washington, United States

Spanned two core areas of focus: shaping Windows Phone's market positioning through integrated product and brand design, and defining the vision for Windows' connected car experience. Combined HW, SW, and storytelling to deliver future-facing concepts while creating seamless multi-device interactions linking car, home, and mobile.

• Created positioning strategies and hero moments that fused product and market differentiation.
• Co-led 0–1 multi-modal design for "bring your own device" car connectivity prototype for OEMs.
• Designed cross-device experiences where product and brand acted as one.
• Produced future-state concepts that influenced next-gen mobile strategy.
