Summary

I am a Professor in Aerospace Engineering and Engineering Mechanics at the University of Texas at Austin and Chair of Good Systems. I also founded the robotics company Apptronik Systems. I received a Ph.D. in Electrical Engineering from Stanford University and was a La Caixa Foundation Fellow. I lead the Human Centered Robotics Laboratory, an experimental facility focusing on high performance control, embodiment and intelligence of humanoid robots as well as strength augmentation exoskeletons. I publish and teach in areas related to realtime decision and control of human-centered robots, hardware design of high performance humanoid robots, and safety capabilities for mobile humanoid robots. I was awarded the NASA Elite Team Award for my contributions to NASA's Johnson Space Center Software Robotics and Simulation Division.
