Top Skills

Design for Manufacturability

Machining

Geometric Dimensioning & Tolerancing

Armen Arakelyan

Co-Founder / CTO @ Ornadyne

Burbank, California, United States

Summary

I like expensive guitars, loud motorbikes, and fast cars.

Experience

Ornadyne

Co-Founder / CTO

March 2026 - Present (4 months)

Los Angeles, CA

SpaceX

Components Engineer

July 2025 - April 2026 (10 months)

Los Angeles, CA

Manufacturing engineer for Starship production machining.

USC Rocket Propulsion Laboratory

3 years 10 months

Machining Team Lead

June 2023 - May 2025 (2 years)

Los Angeles, California, United States

-Responsible for the production of all machined flight and test hardware, for record breaking 145km altitude launch Aftershock

-Managed over $40000 worth of shop tooling, stock, and machinery.

-Designed components for efficient manufacturability and developed comprehensive manufacturing plans.

-Lead the machining team to produce reliable, precision hardware for all projects.

-Train new machinists

Manufacturing and Propulsion Engineer

August 2021 - June 2023 (1 year 11 months)

Los Angeles, California, United States

Active Manufacturing Engineer and machinist at USC Rocket Propulsion Lab. I develop manufacturing processes for high performance vehicles and machine

parts on both manual and CNC machines. I strive to emphasize design for manufacturability through the use of GD&T and stack-up analysis.

Additionally, I am active engineer on the propulsion and avionics teams. Currently I am involved with the Rangefinder system doing Link Budget Analysis.

Meggitt
Mechanical/Electrical Engineering Intern
June 2023 - August 2023 (3 months)
Simi Valley, California, United States

Engineering Intern for RF Cable design and production team.

-Validated a demo VNA for potential use in production by writing Visual Basic programs to simulate testing procedures.

-Analyzed raw cable data in Excel to validate against standard performance.

-Learned about S-Parameter and impedance measurements using Vector Network Analyzers and Time-Domain Reflectometers

Education

Y Combinator
P26 · (March 2026 - June 2026)

University of Southern California
Bachelor of Science - BS, Aerospace, Aeronautical and Astronautical Engineering · (2021 - 2025)
