Andrew Kwon

Mechanical Design Engineer | Northrop Grumman | Prev @ Boeing, PNNL, Berkeley Lab
Portland, Oregon, United States

Summary

Active U.S. Top Secret Clearance.

Experience

Northrop Grumman
Mechanical Design Engineer
June 2026 - Present (1 month)
Salt Lake City, Utah, United States

Active U.S. Top Secret Clearance.

Boeing Defense, Space & Security
Structural Design & Payloads Engineer
August 2024 - May 2026 (1 year 10 months)
San Antonio, Texas, United States

Active U.S. Top Secret Clearance.

National AI Institute
Design Engineering Researcher
October 2023 - June 2024 (9 months)
Seattle, Washington, United States

The project is centered around building an AI powered prototype which would allow Speech Language Pathologists (SLPs) to better access and manage their daily workloads by providing them with a platform that can quickly store patient information, access patient profiles, and organize patients in a more efficient manner.

University of Washington
Design Lead - Executive Function
September 2023 - June 2024 (10 months)
Seattle, Washington, United States

Lead design researcher focusing on executive function when it comes to human-centered design. Co-Authored a white paper discussing impacts of

cognitive bias on design decisions leading to greater design flaws backed by data driven research.

Pacific Northwest National Laboratory

7 months

Power Systems Engineering Intern

June 2023 - December 2023 (7 months)

Richland, Washington, United States

Power Systems Engineering Intern

June 2023 - December 2023 (7 months)

Richland, Washington, United States

- Developed data infrastructure for resilience modeling on the PR100 team
- Incorporated more efficient data structuring to provide higher response times for fragility curve creation
- Laid groundwork for future large data scaling for theoretical/resilience modeling of power systems assets
- Collaborated closely with clients to optimize the EGRASS platform (R&D100 Award), aligning it with local research initiatives in the Puerto Rican region.

Berkeley Lab

Data Engineering Intern

June 2021 - August 2021 (3 months)

San Francisco Bay Area

Performed high precision modeling/testing on high performance computer architecture for the High Energy Physics Division at Berkeley Laboratory. Worked closely with research scientists to redesign LSTM logic along with comprehensive validation testing to ensure optimal scalability, energy efficiency, precision, and performance.

Education

University of Washington

Bachelor of Science - BS, Human Centered Design Engineering · (September 2020 - June 2024)

Camas High School

· (2016 - 2020)
