Board of Governance, BlockCertsAI | Web4 Genesis Block KYC SSO | Unifying Fragmented Blockchain Utility | The User-Owned Decentralized Internet

Roanoke, Virginia, United States

Summary

Board of Governors | BlockCertsAI – Decentralizing Healthcare, Voting & Digital Trust with Web4

I'm on a mission to decentralize the digital world—starting with healthcare, voting, and online trust.

As a Board member of BlockCertsAI, I’m helping to build a platform that redefines how we control our data. We’re developing authenticated, AI-secured systems for mobile voting, self-sovereign health records, and fraud-free consumer reviews—powered by blockchain, not big tech.

BlockCertsAI replaces the outdated Web2 model with a transparent, KYC-authenticated internet experience. It’s a zero-trust architecture designed for a future where your identity, privacy, and digital rights are yours alone.

From cockpit to code, I’ve always believed in systems that work at scale, under pressure, and with purpose. Now, I’m inviting forward-thinking partners and investors to help shape the next era of digital infrastructure—built on truth, not trust.

Let’s build the Outernet.

USN A-6, 385 traps USS America, FTL 747, Fedex MD-11 captain 22 years. 38 year career - takeoffs and landings equal.

Experience

BlockCerts Blockchain
Board Member
September 2018 - Present (6 years 11 months)

Vancuver Canada

BlockCerts AI Blockchain is the worlds first KYC compliant Authenticated Intelligence Super-App platform. Authenticated decentralization will transform data security and privacy.

FedEx
Retired
January 2025 - January 2025 (1 month)
