Certified Palantir Foundry Data Engineer Professional

SAI CHARAN VELPULA

Palantir Foundry Certified | Data Engineer | PySpark | Python | SQL | Big Data

Hyderabad, Telangana, India

Summary

As a Data Engineer Analyst at Accenture, I specialize in building and optimizing ETL pipelines, ensuring the seamless migration of applications to the Palantir Foundry platform. My academic foundation in Mechanical Engineering from CVR College of Engineering has been enriched with cutting-edge Data Science and Machine Learning skills from Scaler, enabling me to deliver high-quality data solutions.

Our team has led successful migrations from traditional on-premises environments to Palantir Foundry, and I have contributed by developing robust PySpark and Python pipelines. With a focus on data integrity and functional programming, I provide accurate project estimations, driving client confidence and streamlining resource planning.

Experience

Accenture

3 years 7 months

Data Engineer Analyst

March 2024 - Present (1 year 5 months)

Specialize in building robust ETL pipelines and seamlessly migrating applications to Palantir Foundry platform.

· Led successful migrations from on-premises environments (e.g., Dataiku and Hadoop data lake) to Palantir Foundry, ensuring data accuracy, quality, and availability for downstream applications.

· Developed end-to-end ETL pipelines using PySpark and Python in Palantir Foundry, facilitating smooth data workflows.

· Implemented well-designed PySpark codes in Palantir Foundry, adhering to best practices and coding standards.

· Provided accurate workload estimations to clients, offering insights into project timelines and resource requirements.

· Key Achievement: Successfully migrated a use case from Dataiku to Palantir Foundry, achieving a performance improvement of up to 30%.

Data Engineer Associate
January 2022 - March 2024 (2 years 3 months)
